

Appendix A: List of Boxes, Figures, and Tables

1	SUMMARY, ISSUES , AND OPTIONS		
Boxes			
1-A.	A Road Map to the Full Assessment, 2	1-5.	Species' Pathway and Implementation of Prevention Program, 8
1-B.	Failure and Success: Lessons from the Fire Ant and Boll Weevil Eradication Programs, 10		Examples of Control Technologies for Non-Indigenous Species, 9
1-c.	OTA's Advisory Panel Envisions the Future, 16	1-6.	Areas of Federal Agency Activity Related to NIS , 12
1-D.	The National Environmental Policy Act and Non-Indigenous Species, 18	1-7.	Basic Legal Approaches Used by States for Fish and Wildlife Importation and Release, 14
1-E.	How New Zealand Addresses Non-Indigenous Species, 20	2	THE CONSEQUENCES OF HARMFUL NON-INDIGENOUS SPECIES
1-F.	How to Improve the Lacey Act, 23	Boxes	
1-G.	National Minimum Standards for State Fish and Wildlife Laws, 26	2-A.	Terms Used By OTA, 53
1-H.	How to Improve the Federal Noxious Weed Act. 29	2-B.	The Case of the Brown Trout: Opposing Views of Fish Introductions, 64
Figure		2-c.	Economic Losses Caused by Non-Indigenous Weeds, 66
1-1.	State-by-State Distribution of Some High Impact Non-Indigenous Species, 4	2-D.	Case Study of An Affected Industry: The "One-Two Punch" of Asian Clams and Zebra Mussels on the Power Industry, 68
Tables		Figures	
1-1.	Estimated Numbers of Non-Indigenous Species in the United States, 3	2-1.	Scope of Study, 52
1-2.	Estimated Cumulative Losses to the United States From Selected Harmful Non-Indigenous Species-1906-1991, 5	2-2.	How Frequent Are High-Impact Non-Indigenous Species?, 58
1-3.	Worst Case Scenarios: Potential Economic Losses From 15 Selected Non-Indigenous Species, 6	2-3.	State by State Distribution of Some High-Impact Non-Indigenous Species, 59
1-4.	Lag Times Between Identification of	2-4.	Reported Effects of Non-Indigenous Species in the United States, 60
		2-5.	How Often Do Intentional Versus Unintentional Introductions Have Harmful Effects?, 62

Tables	4	THE APPLICATION OF DECISIONMAKING METHODS
2-1. Groups of Organisms Covered by OTA's Contractors, 55	Boxes	
2-2. Estimated Cumulative Losses to the United States From Selected Harmful Non-Indigenous Species, 1906-1991,69	4-A. History of Fish and Wildlife Service Attempts To Implement Clean Lists under the Lacey Act, 111	
2-3. Contribution of Non-Indigenous Species to Threatened and Endangered Species Listings by the U.S. Fish and Wildlife Service, 72	4-B. Siberian Timber Imports: A Potentially High-Risk Pathway, 118-119	
2-4. Examples of Non-Indigenous Species Problems in the National Parks, 75	4-c. Macroeconomics and Non-Indigenous Species, 124	
3 THE CHANGING NUMBERS, CAUSES, AND RATES OF INTRODUCTIONS	4-D. outline of Steps for Benefit/Cost Analysis of Non-Indigenous Species 128	
Boxes	4-E. The IUCN Position Statement on Translocation of Living Organisms, 129	
3-A. The Unwelcome Arrival of the Asian Tiger Mosquito, 81	4-F. Prominent Decisionmaking Protocols, 130	
3-B. Importations for Fish and Wildlife Management Have Decreased, 99	Figures	
3-c. Dry Ballast Has Ceased to be a Pathway, 100	4-1. Application of the APHIS Generic Pest Risk Assessment Process, 116	
Figures	4-2. Relative Extents to Which Effects of Indigenous and Non-Indigenous Species are Amenable to Economic Quantification, 123	
3-1. Generic Pathways of Species Entry and Spread, 78	4-3. National Costs and Benefits of Detecting Forest Pest Introductions in New Zealand, 125	
3-2. State by State Spread of Four Harmful Non-Indigenous Species, 86-87	4-4. The Major Interests Involved in Shaping Non-Indigenous Species Policy, 133	
3-3. Estimates of the Cumulative Numbers of Non-Indigenous Species of Foreign Origin in the United States, 94	Tables	
3-4. Numbers of New Insect and Other Invertebrate Species Established in California, 1955-1988, 97	4-1. General Approaches to Making Decisions About Non-Indigenous Species, 108	
Tables	4-2. Examples of Clean and Dirty Lists in Statutes or Regulations, 109	
3-1. Some Species of Foreign Origin Introduced or First Detected in the United States From 1980 to 1993, 101-106	4-3. Relative Technical Feasibility of Comprehensive Clean Lists for Regulating Importation of Major Groups of Non-Indigenous Species, 110	
3-2. Estimated Numbers of Non-Indigenous Species in the United States, 92-	4-4. Documented Benefit/Cost Ratios for Eradication, Control, or Prevention of Selected Non-Indigenous Species, 126-127	
3-3. Estimated Numbers of Non-Indigenous Species in Selected States, 95	5	TECHNOLOGIES FOR PREVENTING AND MANAGING PROBLEMS
34. Number of New Species of Foreign Origin Established Per Decade, 96	Boxes	
3-5. Factors Affecting Species Movements, 98	5-A. Failure and Success: Lessons From the Fire Ant and Boll Weevil Eradication Programs, 149	

- 5-B. Ecological Restoration in the Hole-in-the-Donut, Everglades National Park, Florida, 159
- 5-c. The Loss of Chemical Pesticides: A Real Example, 161
- Tables
- 5-1. Examples of Treatment Technologies for Importing Commodities, 140
- 5-2. Lag Times Between Identification of Species' Pathway and Implementation of Prevention Program, 144
- 5-3. Examples of Control Technologies for Non-Indigenous Species, 152
- 5-4. Examples of Registered Microbial Biological Control Agents, 154
- 5-5. Examples of Technologies Used in Zebra Mussel (*Dreissena polymorpha*) Education Programs, 158
- 6 A PRIMER ON FEDERAL POLICY
- Boxes
- 6-A. A Locator for Federal Agencies Discussed in Chapter 6, 164
- 6-B. Executive Order 11987—May 24, 1977, Exotic Organisms, 167
- 6-C. Introduction of Non-Indigenous Species in the National Parks, 190
- Figures
- 6-1. Account Receipts of the FWS Federal Aid to States Program, 186
- 6-2. Growing Distributions of Three Noxious Weeds in the Northwest, 191
- Tables
- 6-1. Delivery of Requirements Under the Nonindigenous Aquatic Nuisance Prevention and Control Act, 169
- 6-2. Areas of Federal Agency Activity Related to NIS, 171
- 6-3. Federal Coverage of Different Groups of Organisms, 172
- 6-4. APHIS's Pest and Disease Exclusion Activities, 174
- 6-5. Microbial Pesticides Registered by EPA, 198
- 7 STATE AND LOCAL APPROACHES FROM A NATIONAL PERSPECTIVE
- Boxes
- 7-A. *Maine v. Taylor*: A Key Constitutional Decision, 202
- 7-B. When Federal and State Interests Collide: Control of Harmful NIS In and Around Protected Lands, 205
- 7-C. Views from the State Fish and Wildlife Agencies, 210-211
- 7-D. Washington State's New Quarantines on Natural Area Weeds, 226-227
- 7-E. Illinois Shifts to Indigenous Plants, 228
- Tables
- 7-1. Basic Legal Approaches Used by States for Fish and Wildlife Importation and Release, 212
- 7-2. Numbers of Species or Groups Prohibited from Importation and/or Release by States, 213
- 7-3. Gaps in Legal Authority, 214
- 7-4. Decisionmaking Standards Used by States, 215
- 7-5. Non-Indigenous Species Decisionmaking Standards in Relation to State Environmental Policy Acts, 216
- 7-6. References to Key State Statutes and Regulations on Importation and Release of Fish and Wildlife, 222-223
- 8 TWO CASE STUDIES: NON-INDIGENOUS SPECIES IN HAWAII AND FLORIDA
- Boxes
- 8-A. Costs of Hawaii's Major Fruit Fly Pests and Their Eradication, 244
- 8-B. The Potential Invasion and Impact of the Brown Tree Snake in Hawaii, 247-248
- 8-C. A View from Hawaii: Recommendations of the Nature Conservancy and Natural Resources Defense Council, 255
- 8-D. Non-Indigenous Species and the Effects of Hurricane Andrew, 259

Figures		9-2.	Who Regulates Which GEO Releases?, 272
8-1.	Perceived Importance of Pathways in the Introduction of Insect Pests and Illegal Animals in Hawaii, 245	9-3.	Current and Potential Future Releases of GEOs, 275
8-2.	Protected Areas in Southern Florida, 256	94.	Selected Recent Discussions of the Environmental Effects of Releasing GEOs, 280
Tables		9-5.	Federal Pre-Release Requirements for Small-Scale Releases of Certain Non-Indigenous Species (NIS) and GEOs, 281
8-1.	Past and Present Status of Nonmarine Species in Hawaii, 235	10	THE CONTEXT OF THE FUTURE: INTERNATIONAL LAW AND GLOBAL CHANGE
8-2.	Significant Non-Indigenous Pest Species in Hawaii, 237	Boxes	
8-3.	Non-Indigenous Species in Hawaii: Roles of Federal and State Agencies, 241	10-A.	U.S. Exports of Non-Indigenous Aquatic Species, 288
8-4.	Research Costs for Sugar Cane Pest Control in Hawaii, 1986-1992, 243	10-B.	Main International Treaties with Provisions Related to Non-Indigenous Species, 295
8-5.	Estimated Numbers of Non-Indigenous Species in Florida, 257	10-C.	CITES as a Model for International Regulation of Non-Indigenous Species, 298-299
9	GENETICALLY ENGINEERED ORGANISMS AS A SPECIAL CASE	10-D.	OTA's Advisory Panel Envisions the Future, 300
Boxes		Tables	
9-A.	What Do You Call an Organism With New Genes?, 268	10-1.	How Social and Economic Factors and Technological Innovations Could Change the Status of Non-Indigenous Species in the Future, 292
9-B.	The Risks of Genetically Engineered Organisms: Lessons From Non-Indigenous Species, 271	10-2.	Worst Case Scenarios: Potential Economic Losses From 15 Selected Non-Indigenous Species, 301
9-c.	Which Categories of GEOs APHIS Regulates as "Plant Pests," 273	10-3.	Examples of Weedy Plants With Potential for Significant Economic or Ecological Harm, 303
9-D.	Transgenic Fish: Events Surrounding the Auburn Experiments, 278		
9-E.	Controversy Erupts as Upjohn's Transgenic Squash ("ZW-20" Moves Towards Commercialization, 282-283		
Tables			
9-1.	Federal Policies and Regulations Related to the Environmental Release of GEOs Since 1984, 269
