|----------------------------------------------------------------------------------------|-------------|
| CHAPTER 1: Introduction .....                                                          | 3           |
| Background .....                                                                       | 3           |
| The Uses of Biological Data in Maintaining Biological Diversity.....                   | 4           |
| For Determining Status and Trends .....                                                | 4           |
| For Planning and Management .....                                                      | 4           |
| For Monitoring .....                                                                   | 5           |
| Chapter 1 References .....                                                             | 6           |
| CHAPTER 2: Institutional Aspects of Biological Data .....                              | 9           |
| Federal Authorities .....                                                              | 9           |
| State and Private Institutions .....                                                   | 13          |
| Chapter 2 References.....                                                              | 15          |
| CHAPTER 3: Existing Biological Databases .....                                         | 19          |
| Overview .....                                                                         | 19          |
| Existing Databases .....                                                               | 20          |
| Geographic Coverage .....                                                              | 20          |
| Taxonomic Coverage .....                                                               | 23          |
| Data Overlap .....                                                                     | 24          |
| Database Coordination .....                                                            | 24          |
| Existing Institutional Coordination .....                                              | 25          |
| Suggestions for a National Biological Database .....                                   | 26          |
| Chapter 3 References.....                                                              | 28          |
| CHAPTER4: Technical Aspects of Biological Data .....                                   | 31          |
| Data Collection.....                                                                   | 31          |
| Data-Entry Technologies .....                                                          | 31          |
| Remote Sensing Devices .....                                                           | 31          |
| Data Storage .....                                                                     | 33          |
| Software .....                                                                         | 33          |
| Hardware .....                                                                         | 35          |
| Data Retrieval .....                                                                   | 36          |
| Opportunities and Constraints .....                                                    | 37          |
| Chapter 4 References.....                                                              | 37          |
| CHAPTER 5: Summary Findings .....                                                      | 47          |
| APPENDIX A: Examples of Federal Agency Databases Containing Biological Information . . | 47          |
| APPENDIX B: Acronyms .....                                                             | 70          |
| APPENDIX C: Glossary.....                                                              | 71          |

## List of Tables

| <i>Table No.</i>                                                                             | <i>Page</i> |
|----------------------------------------------------------------------------------------------|-------------|
| I. Federal Laws Authorizing Biological Inventories .....                                     | 10          |
| 2. Federal Agencies With Resource Information and Data-Gathering Programs by Resource Type . | 12          |
| 3. Taxonomic Coverage of Federal Agency Databases .....                                      | 21          |

## List of Figures

| <i>Figure No.</i>                                                                                                             | <i>Page</i> |
|-------------------------------------------------------------------------------------------------------------------------------|-------------|
| 1. Paths of Data Transfer for Conventional and Automated Data Entry .....                                                     | 32          |
| 2. Remote Sensing Devices Increase the Coverage of Area From Which Data Is Collected. . .                                     | 33          |
| 3. Representation of a Main Geographic Information System Function of<br>Overlaying Several Types of Environmental Data ..... | 35          |
