	Page
CHAPTER 1: Executive Summary: Overview and Findings . . . . .	3
Economic Returns . . . . .	3
Bibliometrics and Science Indicators . . . . .	6
Research Decisionmaking in Industry and Government . . . . .	7
Summary? . . . . .	9
CHAPTER 2: Measuring the Economic Returns: Progress and Problems . . . . .	13
Introduction . . . . .	13
Econometric Studies at the National Level . . . . .	13
Private R&D Investment . . . . .	13
The Returns, or Lack Thereof, to Federally Funded R&D in Specific Industries. . . . .	14
Industry Case Studies: Agriculture, Aviation, and Health . . . . .	16
Agriculture . . . . .	16
Aviation . . . . .	18
Health . . . . .	19
Spinoffs and Spillovers: NASA. . . . .	22
Macroeconomic Studies . . . . .	22
Macroeconomic Studies. . . . .	23
Patent Analysis . . . . .	23
Implications for Using Economic Investment Models To Guide Federal R&D Decisionmaking . . . . .	24
CHAPTER 3: Noneconomic Quantitative Measures: The "Output" of Science . . . . .	29
Bibliometrics. . . . .	29
The First Generation of Bibliometrics (1961-74) . . . . .	30
The Second Generation (1975-85) . . . . .	31
Other Important Teams . . . . .	36
The Use of Bibliometrics To Evaluate Research at the National Institutes of Health . . . . .	37
NIH Databases . . . . .	37
Bibliometric Studies at NIH. . . . .	38
The Utility of Bibliometrics for Research Decisionmaking . . . . .	40
Science Indicators . . . . .	44
CHAPTER 4: Research Decisionmaking in Industry: The Limits to Quantitative Methods . . . . .	47
Review and Evaluation of Ongoing Research Activities. . . . .	47
Microeconomic Models . . . . .	48
Business Opportunity Techniques . . . . .	49
R&D Project Selection . . . . .	49

	Page
Use of R&D Project Selection Models in Industry . . . . .	51
Reasons for Levels and Patterns of Observed Use . . . . .	52
Strategic Planning and Resource Allocation. . . . .	54
CHAPTER 5: Government Decisionmaking. . . . .	61
The R&D Budgetary Process . . . . .	62
project Selection . . . . .	66
Research Program Evaluation . . . . .	68
Forecasting and Strategic Planning. . . . .	69
Planning for Innovation in Japan . . . . .	69

## List of Tables

Table No.	Page
1. Federal Obligations for Research and Development by Character of Work and R&D Plant: Fiscal Years 1984-85 . . . . .	5
2. Quantitative Methods Used To Evaluate R&D Funding . . . . .	8
3. Expenditures by the Public Sector on Research and Extension Oriented to Improved Agricultural Production Technology 1890-1970 . . . . .	17
4. Econometric Studies of Productivity Return to Agricultural Research in the United States . . . . .	17
5. Economic Costs of Disease: Differential Estimates . . . . .	21
6. Main Problems With the Various Partial Indicators of Scientific Progress and Details of How Their Effects May Be Minimized. . . . .	34
7. Output Indicators for Optical Telescopes—A Summary . . . . .	34
8. Experimental High-Energy Physics, 1977-80 . . . . .	35
9. Assessments of Main Proton Accelerators in Terms of "Discoveries" and "Providing More Precise Measurements" . . . . .	35
10. Percent Change in Sample of Continuing Clusters, 1970-73 . . . . .	41
11. Federal Obligations for Research and Development by Character of Work and R&D Plant: Fiscal Years 1956-85 . . . . .	02

## List of Figures

Figure No.	Page
1. Annual R&D Investment, 1945-82 .. . . .	19
2. Development of a Specialty Cluster, 1970-73 . . . . .	42
3. Formulation of the President's Budget . . . . .	62
4. The Congressional Budget Process. . . . .	64
