

CONTENTS

| <i>Chapter</i> | <i>Page</i> |
|--|-------------|
| 1. Summary | 1 |
| Introduction | 1 |
| Summary of Findings | 2 |
| Conclusions | 6 |
| Research Needs | 7 |
| 2. The Epidemiology of Open-Angle Glaucoma | 9 |
| Incidence and Prevalence | 9 |
| Natural Course of the Disease | 10 |
| 3. Treatment for Open-Angle Glaucoma | 15 |
| Description | 15 |
| Treatment Outcomes | 16 |
| Treatment Effectiveness | 17 |
| 4. Screening Technologies | 23 |
| Screening Considerations | 23 |
| Description of Screening Technologies | 23 |
| Screening Test Accuracy | 25 |
| 5. Medicare Coverage of Screening for Open-Angle Glaucoma | 31 |
| Costs to Medicare | 31 |
| Implications of Scheduled Frequency of Screening and Screening Utilization for Medicare Costs | 32 |
| Costs and Effectiveness of Screening in Preventing Blindness | 34 |
| Problems in Implementing Medicare Coverage of OAG Screening | 34 |
| <i>Appendix</i> | |
| A. Advisory Panel--Project on Preventive Health Services Under Medicare | 37 |
| B. Acknowledgments | 38 |
| C. The Costs of Screening for Open-Angle Glaucoma | 39 |
| References | 53 |

Tables

| <i>Table</i> | <i>Page</i> |
|---|-------------|
| 1. Estimated Prevalence and Five-Year Incidence of Open-Angle Glaucoma in Framingham, Massachusetts, 1973-1975 | 9 |
| 2. Common Forms of Glaucoma | 11 |
| 3. Distribution of Intraocular Pressure in the Elderly, Framingham, Massachusetts, 1973-1975 | 11 |
| 4. Development of Manifest Open-Angle Glaucoma in Individuals With Untreated Ocular Hypertension In At Least One Eye | 12 |
| 5. Three Estimates of Rate of Visual Impairment for Eyes of Patients With Treated Open-Angle Glaucoma | 16 |

CONTENTS (cont'd)

| | | |
|-----|---|----|
| 6. | Summary of Evidence Regarding the Effectiveness of Treatment for Ocular Hypertension in Preventing Open-Angle Glaucoma | 19 |
| 7. | Studies Relating Long-Term Outcomes of Treatment to Lower Intraocular Pressure in Patients Without Visual Field Defects | 20 |
| 8. | A Comparison of Estimates of Accuracy for Three Glaucoma Screening Technologies | 25 |
| 9. | Calculation of Estimated Cost per Confirmed Case of Open-Angle Glaucoma and Number of Cases Diagnosed | 40 |
| 10. | Calculation of Incidence of Open-Angle Glaucoma (OAG) in the Elderly Population | 41 |
| 11. | Glaucoma Screening Test Accuracy Assumptions | 42 |
| 12. | Cost Assumptions | 45 |
| 13. | Number of Open-Angle Glaucoma Cases Diagnosed Under Extreme Assumptions of Test Accuracy and Followup Rates | 46 |
| 14. | High and Low Bounds of Total Costs of Screening and Confirmatory Followup for Open-Angle Glaucoma in Initial Years of a Screening Program | 47 |
| 15. | High and Low Bounds of Cost Per Confirmed Case of Open-Angle Glaucoma in Initial Years of a Screening Program | 48 |
| 16. | High and Low Bounds of Total Costs of Screening and Confirmatory Followup for Open-Angle Glaucoma In Later Years of a Screening Program | 49 |
| 17. | High and Low Bound of Cost Per Confirmed Case of Open-Angle Glaucoma in Later Years of a Screening Program | 50 |
| 18. | Assumptions for Low- and High-Cost Bounds of a Model for Estimating Costs of Screening for High Intraocular Pressure | 52 |

Boxes

| | |
|--|-------------|
| <i>Box</i> | <i>Page</i> |
| A. Components of Screening Test Accuracy | 24 |
| B. Estimation of Theoretical Upper Limits of Accuracy of Tonometry (21 mm Hg or Greater) for Identifying People With Open-Angle Glaucoma | 43 |
