	Page
Abbreviations	vi
Conversion Factors	Vi
Chapter1. Introduction	1
Overview	1
Historical Background.	3
General Water Use in the United States	4
Future Water Supply Needs	5
Chapter2. Overview of Desalination Technologies	7
General Process Descriptions	7
Pretreatmentof Incoming Feed Water	14
Post Treatment of Product Water	16
Selecting the Most Appropriate Desalination Technology	16
Chapter 3. Domestic Applications	17
Industrial Feed- and Process-Water Treatment	17
Industrial Wastewater Treatment	18
Drinking Water Production	18
Military Uses	20
Point-of-Use/Point-of-Entry, or At-Home, Water Treatment	21
Municipal Wastewater Treatment	22
Desalinating Irrigation Water	23
Chapter4. Desalination Costs	25
Desalination Cost Trends	25
Brackish WaterRO andED	26
Seawater Desalination	28
Municipal Wastewater Treatment	29
Hidden Costs Associated With Using Salty Water	29
Chapter 5. Environmental Considerations	31
Waste Concentrates	31
Pretreatment Sludges	33
Chapter6. Desalination Industry	35
Developing International Markets Upto 1980	35
Current International Markets	35
Current Domestic Markets	36
Chapter 7. Government Involvement in Desalination	39
Past Federal Involvement	39
Federal Laws Indirectly Related to Desalination	41
State and Municipal Involvement	42
Chapter8. International Involvement with Desalination	45
International Applications	45
U.S. Government Involvement in International Activities	47
Chapter9. Future Prospects for Desalination in the United States	51
Increasing Use of Desalination Technologies	51
Non-technical Bias Against Desalination Technologies.	52
Potential Avenues for Federal Support of Desalination	52
Appendix A: Desalination Technologies	55
Distillation	55
Reverse Osmosis	56
Electrodialysis	57
Ion Exchange	58
Freeze Desalination	59
New Concepts.	59
Appendix B: Federal Funding for Desalination Research	60
Appendix C: Present Desalination Costs in the United States	61
References	63
