PREFACE	iii
FOREWORD	v
I INTRODUCTORY SESSIONS	
Call to Order by John B. Wachtman, Jr. Chief Inorganic Materials Division, National Bureau of Standards, Conference Chairman. ,... ,	1
Welcoming Remarks on Behalf of the Federation of Materials Societies by Curry E. Ford, President Federation of Materials Societies	7
Joint Keynote Address:	
Part I—Vincent E. McKelvey, Director Geological Survey, U.S. Department of the Interior.. . . .	8
Part II—Thomas V. Falkie, Director, Bureau of Mines, U.S. Department of the Interior.,	17
Congress and the Engineering Foundation Con- ferences by Emilio Q. Daddario, Director Office of Technology Assessment US. Congress	31
II SPECIAL FEATURED PAPERS	
Monday Night Lecture—Decisionmaking in Industry and Its Implication for Energy and Other Resources by H. John Pick, Professor of Materials Technology, Department of Mechanical Engineering, University of Aston, Birmingham, England	37
Thursday Night Lecture—Planning In An Uncertain Environment by W. Dale Compton, Vice Presi- dent—Research, Ford Motor Company, ... , . . . , .	70
111, Tutorial Papers	
Materials Assessments for the United States Con- gress—Albert E. Paladino, Program Manager for Materials, Office of Technology Assessment, U.S. Congress.	79
The Work of the National Commission on Supplies and Shortages—George C. Eads, Executive Director, National Commission on Supplies and Shortages, ,	97
Energy Conservation in the Chemical Industry— Ronald S. Wishart, Jr., Director, Government and Public Issues, Energy, Supply, and Services, Union Carbide Corporation and Milton A. Williams,	

Energy Conservation Coordinator, Chemicals and Plastics, Union Carbide Corporation	112
The Role of Materials and Structures Technology in Defense:	
Part I—Jerome Persh, Staff Specialist for Materials and Structures, Office of the Director of Defense Re- search and Engineering	139
Part II—Morris Steinberg, Director, Technology Applications, Lockheed Aircraft Corporation	153
Part III—Max Williams, Dean, School of Engineer- ing, University of Pittsburgh	172
Utility of Organic Renewable Resources by Ingomar Falkehag, Westvaco Research Center	178
 IV. TASK FORCE REPORTS	
Terms of Reference and Summaries of Reports.	211
Task One: National Materials Assessment for Con- gress: Stresses on the Total Materials Cycle	226
Summary of Task One (A)	226
Summary of Task One (B).	234
Task Two: Government, Supplies, and Shortages . . .	238
Summary of Task Two (A)	238
Summary of Task Two (B)	243
Task Three: Conservation of Energy in Materials Processing	248
Summary of Task Three (A).	248
Summary of Task Three (B)	250
Task Four: The Role of Materials in Defense.	255
Summary of Task Four (A).	255
Summary of Task Four (B)	260
Task Five: Utility of Organic Renewable Resources .	267
Summary of Task Five (A)	267
Summary of Task Five (B)	271
Summary of Task Force Discussion Period	276
 V. FRIDAY MORNING PAPERS	
Substitution—Some Practical Considerations by H. Dana Moran, Manager, Materials Policy and Infor- mation Programs, Battelle Columbus Laboratories .	281
The Commission on Critical Choices for Americans by Michael J. Deutch, Consulting Engineer	299
 —HR 14439/S. 3637: National Materials Policy Bills by Philip Yeager, Counsel, Committee on Science and Technology, U.S. House of Representatives.	303
—Summary of Panel Discussion on HR 14439/S. 3637	305

VI, SUMMARY OF THE CONFERENCE	
—Themes of the Conference	307
VII. APPENDIXES	
A. Conference Participants	309
B.Task Force Membership	314
C. Definition of Renewable Materials Terms—Ed Dyckman, Department of Defense	315
D, A Personal Account of the Henniker IV Con- ference—James HoIL Assistant Program Manage~ Office of Technology Assessment U.S. Congress, Reprinted from Metal Progress	317
