| Chapter                                                                                             | Page |
|-----------------------------------------------------------------------------------------------------|------|
| 1. Summary ... .. 0.. ... .. 0.. 0.. .0 . . . . .                                                   | 3    |
| 2. Introduction, . . . . .                                                                          | 51   |
| 3. Constraints to Oil Shale Commercialization: Policy Options to Address These Constraints. . . . . | 55   |
| 4. Background. ., . . . . .                                                                         | 85   |
| 5. Technology ., . . . .                                                                            | 119  |
| 6. Economic and Financial Considerations . . . . ., ,                                               | 179  |
| 7. Resource Acquisition . . . . .                                                                   | 235  |
| 8. Environmental Considerations. ., . . . . .                                                       | 255  |
| 9. Water Availability . . . . .                                                                     | 359  |
| 10. Socioeconomic Aspects . . . . .                                                                 | 419  |
| Appendixes                                                                                          |      |
| A. Description and Evaluation of the Simulation Model . . . . .                                     | 477  |
| B. Assumptions and Data for Computer Analyses. . . . .                                              | 480  |
| C. Oil Shale Water Pollutants . . . . .                                                             | 481  |
| D. Technologies for Managing Point Sources of Wastewater. . . . .                                   | 488  |
| E. Acronyms, Abbreviations, and Glossary. . . . .                                                   | 513  |
