Summary	3
Cardiac Radionuclide Imaging—A New Technology in Need of Scrutiny.	4
The Technology—Past, Present, and Future	5
Past	5
Present	5
Future	10
The Market and the Industry	12
The Market	12
The Industry	12
The Producers	13
Users and Uses.	15
Data Sources	15
Users	15
Clinical Indications	15
Potential Target Populations for Cardiac Imaging. . .	17
Potential Demand for Cardiac Imaging.	18
Costs and Charges.	19
Costs of a Radionuclide Laboratory	19
Unit Costs of Cardiac Imaging Procedures	23
Current Charges for Cardiac Imaging Procedures. . .	25
Clinical Efficacy	27
Medical Literature: Overview.	27
Diagnostic Information.	28
Cardiac Imaging Procedures: Review of the Medical Literature	30
Technical Challenges and Interobserver Variability..	37
Potential Risks From Cardiac Imaging	37
Cost-Effectiveness Analysis.	39
Framework for Analysis.	39
Cost Effectiveness of Cardiac Radionuclide Imaging. 41	
Policy Implications.	47
Appendix A.—Glossary of Terms.	48
Appendix B.—Manufacturers of Cardiac Radionuclide Imaging Equipment and Supplies	49
References.	56

LIST OF TABLES

Table No.	Page
1. Cardiac Radionuclide Imaging Techniques.	7
2. Estimated Markets for Nuclear Imaging Equipment. 12	
3. Ranks and Market Shares of Producers of Nuclear Imaging Equipment	14
4. Clinical Indications for Cardiac Radionuclide Imaging	16
5. Deaths From Coronary Artery Disease, 1970-77. . .	17
6. Death Rates From Coronary Artery Disease, 1970-77.	17
7. Prevalence and Morbidity Data for Coronary Artery Disease, 1972.	18
8. Hospital Discharges for Coronary Artery Disease, 1969-77.	18
9. Projected "Demand" for Cardiac Imaging.	19

Table No.	Page
10. List Prices of Selected Equipment Suitable for Cardiac Radionuclide Imaging.	20
11. Estimated Annual Fixed Costs of Operating a Radionuclide Imaging Laboratory. . . .	21
12. List Prices of Radionuclides and Cold Product Kits. 22	
13. Production Capacity for Cardiac Imaging Procedures	23
14. Personnel Time Required for Different Cardiac Imaging Procedures and Estimated Cost Equivalents	24
15. Unit Costs of Cardiac Imaging Procedures Assuming Maximal Production Efficiency. . . .	24
16. Suggested Fee Schedules for Cardiac Imaging Procedures.	26
17. Breakeven Points for Laboratory Operation	26
18. Thallium-201 Perfusion Scans in the Diagnosis of Coronary Artery Disease.	32
19. Technetium-99m Radionuclide Angiography in the Diagnosis of Coronary Artery Disease. . .	33
20. Technetium-99m Stannous Pyrophosphate and Thallium-201 Perfusion Scans in the Diagnosis of Acute Myocardial Infarction.	35
21. Thallium-201 Perfusion Scans in the Evaluation of Coronary Artery Bypass Surgery Results. 36	
22. Technetium-99m Pyrophosphate Scans in Patients Who Have Had Coronary Artery Bypass Surgery	37
23. Radiation Exposure From Cardiac Radionuclide Imaging and Selected Radiodiagnostic Procedures. 38	
24. Effectiveness of Alternative Strategies Employing Cardiac Imaging and Exercise Tolerance Testing To Diagnose Surgically Treatable Coronary Artery Disease	43
25. Costs of Alternative Strategies to Diagnose Surgically Treatable Coronary Disease	44
26. Costs and Effectiveness of Alternative Strategies To Diagnose Surgically Treatable Coronary Disease 44	
27. Cost Effectiveness of Alternative Diagnostic Strategies	45
28. Cost-Effectiveness Comparisons Between Alternative Diagnostic Strategies.	45
29. Costs and Effectiveness of Alternative Strategies Employing Cardiac Imaging To Diagnose Surgically Treatable Coronary Artery Disease in Population Subgroups	46
30. Cost-Effectiveness Comparisons Across Population Subgroups	46
