

Contents

<i>Chapter</i>	<i>Page</i>
1. Summary	1
Current Situation—Descriptive	1
Current Situation—Analytic	1
Possible New Directions	3
2. Current Situation in Space Science	5
3. Issues and Findings	9
Lack of Policy Commitment	9
Continuity, Planning, Approaches, Costs, and Liaison	10
Impact of Manned Spaceflight—Present and Future	12
Mix of Science Efforts	16
International Concerns	19
Management Issues	21
4. The Importance of Doing Space Science	25
Introduction	25
Expense of Space Science and Role of Public Support	26
Earth and the Planetary Sciences	27
Formation of the Ozone Layer.....	30
Solar Particle Emissions	30
Weather and Climate	30
Process Interchange in the Earth's Atmosphere	32
Effects of Solar Variations on Communications	34
Satellite Reliability	34
Commercial Importance of Near-Earth Space	35
Appendixes	
A. Trends in the Space Science Budget.	39
B. Successive Galileo Cost Estimates	44
C. Budget for Space Telescope	45
D. Shuttle/ELV Price Comparison	46
E. Economics of the Space Shuttle,	47
F. Space Science Workshop Participants	49
G. Additional Contributors	50
