 137. Are biological systems poised at criticality? T Mora & W Bialek, *J Stat Phys* **144**, 268–302 (2011); arXiv:1012.2242 [q-bio.QM] (2010).
 136. Optimizing information flow in small genetic networks. II: Feed-forward interaction. AM Walczak, G Tkačik & W Bialek, *Phys Rev E* **81**, 041905 (2010); arXiv:0912.5500 [q-bio.MN] (2009).
 135. Spin glass models for networks of real neurons. G Tkačik, E Schneidman, MJ Berry II & W Bialek, arXiv:0912.5409 [q-bio.NC] (2009).
 134. Emergence of long timescales and stereotyped behaviors in *Caenorhabditis elegans*. GJ Stephens, MB de Mesquita, WS Ryu & W Bialek, *Proc Natl Acad Sci (USA)* **108**, 7286–7289 (2011).³
 133. Maximum entropy models for antibody diversity. T Mora, AM Walczak, W Bialek & CG Callan, *Proc Natl Acad Sci (USA)* **107**, 5405–5410 (2010); arXiv:0912.5175 [q-bio.GN] (2009).
 132. From modes to movement in *Caenorhabditis elegans*. GJ Stephens, W Bialek & WS Ryu, *PLoS One* **5**, e13914 (2010); arXiv:0912.4760 [q-bio.NC] (2009).
 131. Optimizing information flow in small genetic networks. I. G Tkačik, AM Walczak & W Bialek, *Phys Rev E* **80**, 031920 (2009); arXiv:0903.4491 [q-bio.MN] (2009).

¹See <http://press.princeton.edu/titles/9911.html>.

²References to the physics e-print archive, <http://arXiv.org>, are given when available. If there is no other pointer, then this is a primary reference; for other work there may be slight differences between the e-print and conventional print versions. Since almost all of my papers are now deposited on the archive before journal publication, more recent papers are ordered by the date of the archive submission.

³For a preliminary account, see GJ Stephens, WS Ryu & W Bialek, arXiv:0912.5232 [q-bio.NC] (2009).

130. Thermodynamics of natural images. GJ Stephens, T Mora, G Tkačik & W Bialek, *Phys Rev Lett* in press (2012); arXiv:0806.2694 [q-bio.NC] (2008).
129. The neural basis for combinatorial coding in a cortical population response. LC Osborne, SE Palmer, SG Lisberger & W Bialek, *J Neurosci* **28**, 13522–13531 (2008).⁴
128. Can we fit all of the data? W Bialek, T Gregor, DW Tank & EF Wieschaus, *Cell* **132**, 17–18 (2008).
127. Statistical mechanics of letters in words. GJ Stephens & W Bialek, *Phys Rev E* **81**, 066119 (2010); arXiv:0801.0253 [q-bio.NC] (2008).⁵
126. Rediscovering the power of pairwise interactions. W Bialek & R Ranganathan, arXiv:0712.4397 [q-bio.QM] (2007).
125. Cell biology: Networks, regulation, pathways. G Tkačik & W Bialek, in *Encyclopedia of Complexity and Systems Science*, RA Meyers, ed, pp 719–741 (Springer-Verlag, Berlin, 2009); arXiv:0712.4385 [q-bio.MN] (2007).
124. Information and fitness. SF Taylor, N Tishby & W Bialek, arXiv:0712.4382 [q-bio.PE] (2007).
123. Efficient representation as a design principle for neural coding and computation. W Bialek, RR de Ruyter van Steveninck & N Tishby, arXiv:0712.4381 [q-bio.NC] (2007).⁶
122. Faster solutions of the inverse pairwise Ising problem. T Broderick, M Dudík, G Tkačik, RE Schapire & W Bialek, arXiv:0712.2437 [q-bio.QM] (2007).
121. Diffusion, dimensionality and noise in transcriptional regulation. G Tkačik & W Bialek, *Phys Rev E* **79**, 051901 (2009);⁷ arXiv:0712.1852 [q-bio.MN] (2007).
120. Information capacity of genetic regulatory elements. G Tkačik, CG Callan Jr & W Bialek, *Phys Rev E* **78**, 011910 (2008); arXiv:0709.4209 [q-bio.MN] (2007).
119. Dimensionality and dynamics in the behavior of *C. elegans*. GJ Stephens, B Johnson-Kerner, W Bialek & WS Ryu, *PLoS Comp Bio* **4**, e1000028 (2008); arXiv:0705.1548 [q-bio.OT] (2007).
118. Information flow and optimization in transcriptional regulation. G Tkačik, CG Callan Jr & W Bialek, *Proc Natl Acad Sci (USA)* **105**, 12265–12270 (2008); arXiv:0705.0313 [q-bio.MN] (2007).
117. Neural decision boundaries for maximal information transmission. T Sharpee & W Bialek, *PLoS One* **2**, e646 (2007); arXiv:q-bio.NC/0703046 (2007).
116. The role of input noise in transcriptional regulation. G Tkačik, T Gregor & W Bialek, *PLoS One* **3**, e2774 (2008); arXiv:q-bio.MN/0701002 (2007).
115. Neural coding of a natural stimulus ensemble: Information at sub-millisecond resolution. I Nemenman, GD Lewen, W Bialek & RR de Ruyter van Steveninck, *PLoS Comp Bio* **4**, e1000025 (2008); arXiv:q-bio.NC/0612050 (2006).
114. Time course of precision in smooth pursuit eye movements of monkeys. LC Osborne, SS Hohl, W Bialek & SG Lisberger, *J Neurosci* **27**, 2987–2998 (2007).

⁴For a preliminary account see arXiv:0803.3837 [q-bio.NC] (2008).

⁵The original title, preserved in the arXiv version, was Toward a statistical mechanics of four letter words. This was rejected without review; the editors claimed that it was “not physics.” Some small changes to the text, some explanation, and a change in title resulted in more serious consideration.

⁶A preliminary account appears in the *Proceedings of the International Symposium on Information Theory 2006*, but this seems to be available only on CDs distributed to meeting attendees (!).

⁷See also the accompanying commentary by R Metzler, *Physics* **2**, 36 (2009).

113. Ising models for networks of real neurons. G Tkačik, E Schneidman, MJ Berry II & W Bialek, arXiv:q-bio.NC/0611072 (2006).
112. Probing the limits to positional information. T Gregor, DW Tank, EF Wieschaus & W Bialek, *Cell* **130**, 153–164 (2007).⁸
111. Stability and nuclear dynamics of the Bicoid morphogen gradient. T Gregor, EF Wieschaus, AP McGregor, W Bialek & DW Tank, *Cell* **130**, 141–152 (2007).
110. Cooperativity, sensitivity and noise in biochemical signaling. W Bialek & S Setayeshgar, *Phys Rev Lett* **100**, 258101 (2008); arXiv:q-bio.MN/0601001 (2006).
109. Synergy from silence in a combinatorial neural code. E Schneidman, JL Puchalla, RA Harris, W Bialek & MJ Berry II, *J Neurosci* **31**, 15732–15741 (2011); arXiv:q-bio.NC/0607017 (2006).
108. Weak pairwise correlations imply strongly correlated network states in a neural population. E Schneidman, MJ Berry II, R Segev & W Bialek, *Nature* **440**, 1007–1012 (2006); arXiv:q-bio.NC/0512013 (2005).
107. Should you believe that this coin is fair? W Bialek, arXiv:q-bio.NC/0508044 (2005).
106. Diffusion and scaling during early embryonic pattern formation. T Gregor, W Bialek, DW Tank, RR de Ruyter van Steveninck, DW Tank & EF Wieschaus, *Proc Natl Acad Sci (USA)* **102**, 18403–18407 (2005).
105. Information based clustering. N Slonim, GS Atwal, G Tkačik & W Bialek, *Proc Natl Acad Sci (USA)* **102**, 18297–18302 (2005); arXiv:q-bio.QM/0511043. See also Supplementary material, arXiv:q-bio.QM/0511042 (2005).
104. A sensory source for motor variation. LC Osborne, SG Lisberger & W Bialek, *Nature* **437**, 412–416 (2005).
