

DEPARTMENT OF CIVIL AND ENVIRONMENTAL ENGINEERING

APPLICATION FOR GRADUATE STUDENT TRAVEL AWARD

During the 2009-2010 academic year, the Department of Civil and Environmental Engineering will provide grants, on a competitive basis, to currently enrolled PhD and MSE students who have been invited to give scholarly papers and presentation of their own work at conferences and meetings. The department will also consider requests for travel grants to fund travel required for scholarly research activities.

Funds will be awarded for up to 50% of the cost of conference attendance or research trip, the balance to be covered by you advisor and/or other funds. If appropriate, students must also apply for support through the Dean's Fund for Scholarly Travel.

Preference in awards will be given to students who have been invited to speak and present their work at conferences and meetings.
