The Sisters Grimm Book 1: Fairy Tale Detectives is a fiction book by Michael Buckley. This book is about two sisters named Daphne and Sabrina whose parents have suddenly disappeared. Daphne and Sabrina are, of course, determined to find them. Since they are now orphans, they are placed in many homes but all of these homes were such bad experiences that they choose to run away and return to the orphanage. Finally, they are placed in someone's house that claims to be their Dad's mom – their 'Grandma'. However, before their parents had disappeared, their dad had told them that his mom had died. Sabrina does not believe that this is her Grandma but Daphne does and is therefore unwilling to run away. This causes lots of arguments between the sisters.

That's just the beginning. The story really gets interesting when the sisters realize that they have responsibilities with their new home, specifically to solve mysteries involving characters from fairy tales like "Who or what stepped on Mr. Applebee's farm and house?"

I recommend this book very much. It pulled me into the story. Every time I finished a page, I wanted to start the next. I just could not stop reading. My favorite part was when Daphne and Sabrina get off a train and first meet their so-called Grandma. I like this part because it would be very weird to meet someone who your parents had said was not alive. If you like mystery, adventure and silliness, I am sure that you will like this book.
