

Wireless Internet Access

Welcome to Princeton University. As a visitor to our campus, please feel free to access our Visitor Wireless Service from your personal computer. This service is extended to all short-term visitors and is available in wireless areas across campus, including areas in the Frist Campus Center, Friend Center, and E-Quad.

Note: Use of the Visitor Wireless Service constitutes your agreement to abide by the University's acceptable use policy. Once you access the Internet, please see the Guidelines for Use Policy at www.princeton.edu/guidelines.

To get started using Visitor Wireless:

1. **Verify that you are in a wireless service area.** Check your wireless network signal for the visitor's wireless network named **puvisitor**.
2. **Connect to the Princeton University Visitor Wireless Network.** Configure your wireless network settings to access **puvisitor**. Instructions for the current PC and Macintosh operating systems follow:

In Windows XP (SP2):

- Click **Start** in the Start Menu.
- Select **Connect To**. (For computers set to use the Classic Start Menu, select **Settings, Network Connections**.)
- Right-click on **Wireless Network Connection**, and select **View Available Wireless Networks**.
- Select **puvisitor** from the list of available wireless networks.
- Click the **Connect** button.

In Mac OS X:

- Open **Applications, Internet Connect**
- Click the **Airport** icon.
- Select **puvisitor** from the network drop-down list.
- Click **OK**.

Helpful Hints:

- Ensure that your wireless card is set to obtain its IP information via DHCP.
- For a map of wireless areas on campus, see www.princeton.edu/wirelessmap.
- More information about Visitor Wireless is available at www.princeton.edu/visitorwireless.

Need Assistance?

- Call the OIT Help Desk at 258-HELP and speak with a Help Desk Specialist around the clock from Sunday, 5 p.m. to Friday, 5 p.m.
- Get in-person assistance at the OIT Solutions Center in the Frist Campus Center (100-level).
