Lab Tours Options

during the Alumni Reception

Meet at the globe on Friday, June 1, 4:00 p.m.

The Higgins Research Lab
The lab features the Thermo Neptune multi-collector inductively coupled plasma mass spectrometer (MC ICP-MS). Higgins and his research team have established protocols for a number of metal isotope systems—magnesium, calcium, and most recently, potassium.

The Grinder Lab
The Princeton Grinder Lab is investigating the three dimensional nature of objects and structures at the millimeter to micron scale using an automated serial grinding and imaging system known as GIRI.

Alumni Reception
Sponsored by The Department of Geosciences
Friday, June 1, 3:30 to 5:30 p.m.
Guyot Hall, Great Hall
Cocktails & hors d'oeuvres served

Class Day Awards
Monday, June 4, starts at 5:30 p.m.
