

# Greening Princeton Meeting Minutes 3/7/11

## Current Projects

### Dining Hall Facts

All colleges except Whitman have agreed to put green facts and tips in their dining hall newsletter. It has been decided that we won't try to get these facts and tips on the TV screens in the dining halls.

### Recycling Email

USG has agreed to send out the blurb about recycling we just have to finalize the email that would go out.

### Study Breaks

We are going to do smaller study breaks with individual advisee groups around Earth Day and use them as a pilot for more study breaks in the fall that might be mandatory.

## Announcements

### PEN Meeting

There are internships listed on the Office of Sustainability's website  
<http://www.princeton.edu/sustainability/about/office/projects/secn/index.xml>.

There is going to be a panel at reunions centered on making reunions themselves more sustainable and Greening Princeton will be involved with that.

An initial planning meeting for Earth Day is going to be held sometime this week if you want to get involved.
