Summer Research Opportunity

The Burke Medical Research Institute invites applications from qualified undergraduate students for our Summer Student Research Program. This program provides an opportunity to conduct cutting-edge research for those students interested in pursuing a career in biomedical sciences. Participants will be part of a laboratory research project related to neural repair and rehabilitation. Summer research students have extensive interaction with their faculty mentors and the Burke Medical Research staff.

The program will run from June 6th through August 12th

Trainees will receive a stipend of $3,000

Housing and transportation are the responsibility of each trainee

Applications are due by April 8th, 2016

To apply and get further details, please go the website:
