Faculty Positions in Mechanical Engineering

The Department of Mechanical Engineering at the University of Colorado Boulder invites applications for several tenure-line faculty positions beginning fall 2015. We are particularly interested in candidates with core mechanical engineering disciplinary expertise and demonstrated strong research experience. Candidates must clearly indicate their areas of relevant research expertise in their cover letters. In addition, we are also interested in candidates with strong records of multidisciplinary research potentially leading to disruptive technologies/innovations; each such candidate must indicate in the cover letter a specific disruptive technology related to his or her research and why it is important to future mechanical engineers.

Candidates are expected to complement and strengthen existing departmental research or develop new high-impact research directions. Candidates must have an earned doctorate in Mechanical Engineering or a closely related science or engineering field with a strong background in research. Successful candidates must have a strong commitment to scholarship, the potential to develop an externally funded research program, and ability to teach at the undergraduate and graduate levels in mechanical engineering. While the positions are normally at the assistant professor level, outstanding candidates with already established record of excellence in research and teaching will be considered for appointment at an appropriately higher academic level.

Interested persons should apply through the web site http://www.jobsatcu.com/postings/89702 and submit electronic files (pdf format) containing a cover letter, curriculum vita, two-page statements of research and teaching interests, respectively, and the names, addresses, and telephone numbers of at least three references.

Review of applications will begin as they are received, and will continue until the positions are filled. Additional information regarding the Mechanical Engineering Department search process as well as our research and academic programs can be found at http://www.colorado.edu/mechanical. The University of Colorado is an Equal Opportunity Employer committed to building a diverse workforce. We encourage applications from women, racial and ethnic minorities, individuals with disabilities and veterans. Alternative formats of this ad can be provided upon request for individuals with disabilities by contacting the ADA Coordinator at: hr-ada@colorado.edu. The University of Colorado Boulder is committed to providing a safe and productive learning and living community. To achieve that goal, we conduct background investigations for all final applicants being considered for employment. Background investigations include reference checks, a criminal history record check, and when appropriate, a financial and/or motor vehicle history.
