The Department of Aerospace and Mechanical Engineering at USC is seeking applications and nominations for tenure-track or tenured faculty. All fields of aerospace and mechanical engineering will be considered, with particular emphasis on computational engineering. We also encourage special applications from more senior scholars who have a well-established academic record and whose accomplishments are leading/transforming their fields of study. Exceptionally strong candidates will also be considered for appointment to an endowed professorship.

Applicants must have earned a Ph.D. or the equivalent in a relevant field by the beginning of the appointment and have a strong research and publication record. Applications must include a letter clearly indicating area(s) of specialization, a detailed curriculum vitae, a concise statement of current and future research directions, a teaching statement, and contact information for at least four professional references. This material should be submitted electronically at http://ame-www.usc.edu/facultypositions/. Early submission is strongly advised and encouraged as the application review process will commence January 5, 2015.

USC is an equal-opportunity educator and employer, proudly pluralistic and firmly committed to providing equal opportunity for outstanding persons of every race, gender, creed and background. The University particularly encourages members of underrepresented groups, veterans and individuals with disabilities to apply. USC will make reasonable accommodations for qualified individuals with known disabilities unless doing so would result in an undue hardship. Further information regarding accommodations is available by contacting uschr@usc.edu.
