

Robert H. Socolow, Professor of Mechanical and Aerospace Engineering at Princeton University, teaches in both the School of Engineering and Applied Science and the Woodrow Wilson School of Public and International Affairs. With ecologist, Stephen Pacala, Socolow leads the University's Carbon Mitigation Initiative. His research focuses on technology and policy for fossil fuels under climate constraints. He was awarded the 2003 Leo Szilard Lectureship Award by the American Physical Society: "For leadership in establishing energy and environmental problems as legitimate research fields for physicists, and for demonstrating that these broadly defined problems can be addressed with the highest scientific standards." Socolow earned a B.A. in 1959 (summa cum laude) and Ph.D. in theoretical high energy physics in 1964 from Harvard University.
