</table>
| New                 | New                                        | - New application  
- For competitive sponsor resubmissions (such as NIH) with a new deadline  
- NSF renewals should be proposal type New |
| Resubmission        | Preaward revision                          | - Amended or revised application before the proposal is awarded  
- Do not use this type for proposals that have already been awarded and set up in PeopleSoft.  
- Using this type overwrites an already-approved Coeus institute proposal.  
- Used for documentation of congruency letters/special review tab updates  
- Examples  
  o Sponsor requests changes to an existing, submitted proposal before issuing the award, such as budget changes  
  o NSF requests a revised proposal budget before issuing the award  
  o Do not use for Adobe or ASSIST NIH resubmissions. NIH “01A” resubmissions should be submitted as New applications in Coeus. For s2s NIH resubmissions, you may use type Resubmission in Coeus (GCAs: when prompted, you should choose the option to generate a new IP number.) |
| Renewal             | Renewal of an Existing Award               | - An application requesting additional funding for a period subsequent to that provided by a current award.  
- Example  
  o Existing 5 year award is ending this year. PI is applying for another 5 years of funding.  
- Typical proposal type for DOE and some industry sponsors for existing awards  
- NSF renewals should be proposal type New in anticipation of a new sponsor award number |
| Revision            | Supplement to an Existing Award            | - Supplemental (additional) funding for an existing award that has been set up in PS Financials  
- Includes requests for additional funding to meet increased or new costs that are within or related to the scope of the approved application,  
- Overlaps the existing period of performance.  
- Example:  
  o Existing award was originally funded for $100k. PI applies for additional funding of $50k that was not part of the sponsor's original anticipated award amount.  
- SF424 R&R form uses the term “Revision” for this scenario. Selecting Supplement will map to Revision on the SF424 R&R form for s2s submissions. |
| Post-Award Revision (not Grants.gov) | Revision of an Existing Award | • Revising budgets for any of the years on an existing award.  
• This type should not be used for additional funding.  
• This type should be used when the sponsor requests a revised budget after the proposal has been awarded and has been set up in PS Financials.  
• Examples:  
  o The sponsor has requested a revised budget for year 2 after already awarding year 1.  
  o The sponsor requests a spending plan every year for an existing award  
  o The sponsor requests a budget each year to reflect the current fringe rate for an existing award  
• Sponsor has a budget reduction and is requesting a revised, reduced budget. This type routes directly to ORPA and does not go through the departmental approval path. |
| White Paper / Letter of Intent | White Paper / Letter of Intent / Pre-Proposal | • This type must be entered in Coeus if it requires ORPA approval  
• Also known as a pre-proposal, a white paper / letter of intent is a condensed version of a proposal.  
• The sponsor determines if the PI should submit a full proposal based on the information in the pre-proposal  
• This proposal type might not have a budget. If so, set the $0 budget to final and complete in order to submit the proposal. |
| Non-Funded | Non-Funded Agreement | • Use this type for non-funded agreements  
• Examples:  
  o Non-funded data agreement  
  o Non-funded research collaboration agreement  
  o Non-funded Memorandum of Understanding (MOU)  
  o Non-funded Non-Disclosure Agreement (NDA) |
| Task Order | Task Order | • Used when the funding on the main award has already been received and Princeton is awarding new projects based on the outcome of an internal competition. (Must have ORPA Director’s approval) |

Also note, continuation will be discontinued as a type. It will still appear on the menu, but will be labeled: “~No longer used – Continuation”
