Princeton University  •  Department of Physics

Hamilton Colloquium Series – Spring 2015

• 02/12/2015  Zheng-Tian Lu, University of Chicago  
  “Atom Trap, Krypton-81, and Global Groundwater”

• 02/19/2015  Charles Kane, University of Pennsylvania  
  “Topological Boundary Modes from Quantum Electronics to Classical Mechanics”

• 02/26/2015  No colloquium event was scheduled.

• 03/05/2015  No colloquium event was scheduled.

• 03/12/2015  Per Helander, Max-Planck Institute for Plasma Physics, Greifswald, Germany  
  “Theory of non-symmetric plasma confinement and a new large physics experiment in Germany”

• 03/19/2015  No colloquium event was scheduled (spring semester break).

• 03/26/2015  Ali Yazdani, Princeton University  
  “Spotting the elusive Majorana under the microscope”

• 04/02/2015  Cindy Regal, University of Colorado  
  “Interferometry in a strong light”

• 04/09/2015  No colloquium event was scheduled.

• 04/16/2015  Pasquale Blasi, INAF – Arcetri Astrophysical Observatory, Florence, Italy  
  “Cosmic Rays: A journey from accelerators to Earth”

• 04/23/2015  No colloquium event was scheduled.

• 04/30/2015  Hamilton Lecture: Deborah Jin, JILA, University of Colorado  
  “Fun with Ultracold Atoms”
