STUDENT SPOTLIGHT

Chiraag Galaiya ‘13
Electrical Engineering

This month’s spotlight shines on Chiraag Galaiya, a Senior in the Electrical Engineering department, who is pursuing the Materials Science and Engineering Certificate. For his Senior Thesis, Chiraag is working with Prof. Naveen Verma to develop and optimize a thin film power management system for flexible amorphous silicon transistors and diodes. Chiraag has worked with Prof. Verma before, such as after his Sophomore year, when Chiraag worked to develop a mechanism for designing a microelectrode array for neural signal detection. Chiraag isn’t all research though; last summer he worked for a financial technology start-up. After graduation, Chiraag will be working for Crossix, a pharmaceutical marketing analytic start up in New York City. Chiraag hopes one day to start his own company with the knowledge he has learned in his research and the wisdom he has gained from his start-up experiences. While not doing school work or research, Chiraag keeps busy with a plethora of extracurricular activities. He affiliates with Princeton Tower club, and is a member of Princeton South Asian Theatrics, and the dance group Naacho. Chiraag is also a member of the IEEE Student Chapter, and Alcohol Initiative. Best of luck to Chiraag as he goes forth into the world! -Written by Nigel Brauser ’13
