Introduction

*Chloride channel inhibitors may have a lower barrier height than the corresponding selectivity filter.

Abstract

Selective barrier heights of M hurdles on SIC.

Keywords: Chloride channels, Selectivity, Membrane potential, Permeation.

By writing the volume of the second section in terms of the volume of the first section, we obtain the volume of the second section as a function of the volume of the first section.

\[
\begin{align*}
\psi &< \lambda < \phi \\
\frac{\lambda}{(\lambda - \psi)} &+ \frac{\lambda}{(\lambda - \phi)} = \lambda
\end{align*}
\]
