Welcome!

Transportation & Parking Services is pleased to report that there are now more than **300 fewer vehicles commuting to the University on a daily basis.** In three years, the University is more than halfway to reaching its sustainability goal of reducing the number of cars commuting to campus by 10% by 2020. Thank you to all TDM participants for your support and involvement!

As we enter our fourth year of TDM programs, we are continuously enhancing and expanding many of our existing programs. This past August, we launched the Mass Transit Subsidy Program for commuting graduate students; carpoolers now receive a $50 gas card each quarter, up from $25; and we’ve added a new plug-in Toyota Prius to our WeCar fleet as well as a sixth car sharing location.

As always, we welcome your input and feedback, and if you’re thinking of joining any of our TDM programs, please contact us.

**DID YOU KNOW?**

Many car insurance companies offer discounts to those who participate in a carpool or vanpool program. Contact your insurance provider to find out if you qualify.

**Carpooling**

There’s good news for carpoolers! Active members now receive a **$50 gas card** each quarter, up from $25. Carpoolers also receive a hangtag for designated carpool parking in various campus locations. In addition to the gas card, new members are eligible to receive a $25 oil change certificate.

Individuals looking to find other Princeton employees to carpool with may search the free [University Rideshare Database](http://www.princeton.edu/transportation/tdm). Students looking to carpool during the upcoming holidays, whether they need a ride or are willing to drive, may search [Princeton Rides Home](http://www.princeton.edu/transportation/tdm), a rideshare database specifically geared towards students.

For more information about carpooling, visit the Transportation & Parking Services [website](http://www.princeton.edu/transportation/tdm) or contact Andrea DeRose.
Car Sharing (WeCar)

In response to strong membership growth, Transportation & Parking Services has added a sixth WeCar location at Lawrence Apartments. Additionally, a new plug-in Toyota Prius is available at the Graduate College location.

As of September 2011, over 420 University community members have enrolled in the WeCar Car Sharing Program at Princeton. Car sharing enables members to conveniently rent a car for a few hours or for the entire day.

University Department/Office Accounts
WeCar is a great alternative to renting a car for business travel. WeCar offers the convenience of a private vehicle without the hassle of reimbursements for rental expenses or worrying about the wear-and-tear of one’s own private vehicle. When University departments and offices open a WeCar account, the first year membership fee is waived.

WeCar Locations
- Graduate College (plug-in Prius) NEW VEHICLE!
- Lawrence Apartments NEW LOCATION!
- Frist Campus Center (2 vehicles)
- Lot 21
- Hibben-Magie Apartments

Questions?
During the academic year, WeCar representatives are available to speak to in person every Wednesday from 11:30 am to 1:30 pm on the 100 Level of the Frist Campus Center.

Vanpooling

Princeton University currently has six vanpools operating daily from locations in New Jersey and Pennsylvania to campus. Vans are maintained and provided by VSPI, Inc. through the University at no cost to participants.

There are vacancies in the following vanpools:
- Cherry Hill, NJ (1 vacancy)
- Morrisville, PA (1 vacancy)

If you are interested in joining one of these vans or starting one of your own, visit the Transportation & Parking Services website or contact Andrea DeRose.

Biking

Registration
Members of the University community who ride their bicycle to and around campus are reminded to register their bike with Transportation & Parking Services. Registration is free and may be completed online; valid for five years; and doing so increases the chances of recovery in the event of theft or abandonment.

Since the implementation of the Princeton Bicycle Registration Policy in 2009, over 1,900 bikes have been registered.

Do-it-yourself Bike Repair & Maintenance
The Cyclab, Princeton's bicycle cooperative, is a do-it-yourself repair shop located at 130 University Place behind the WaWa. Tools are provided and volunteer mechanics are on hand to assist with any repairs Sundays between 1 pm and 5 pm and Wednesdays between 5 pm and 9 pm. For more information, visit their website.

Eco-friendly & Accessible
The TigerTransit fleet is comprised of 30’ low-floor, fully accessible buses that run on B20 biodiesel fuel. The buses are clearly identified as Princeton University TigerTransit buses with the following specifications and features:

- Passenger Capacity: 33 seated, 15 standing
- Wheelchair Capacity: 2
- Accessibility Features: Flip-out ramp; Low-floor kneeling
- Bicycle Rack: Front load rack, holds up to 2 bikes
- Tracking: Web-based GPS real-time tracking

TigerTransit
First Transit, Outstanding Business Partner of the Year
First Transit, the service provider for Princeton University's TigerTransit system, was awarded Outstanding Business Partner of the Year for its operations in the university transit market at the annual National Association of College Auxiliary Services (NACAS) conference in Orlando, Florida, October 23–26, 2011. Princeton's Transportation & Parking Services recommended First Transit for the award based on the exceptional service, dedication to safety, and reliable and dependable staff they provide to the University community.

Princeton Sharrows
Princeton Borough and Princeton Township have begun the installation of shared lane markings, also known as “sharrows,” on several roadways surrounding campus. Sharrows mark roadways that are shared equally by motorists and bicyclists.

The following roads near campus have been designated as sharrows:

- Nassau Street between Route 206 & Snowden Lane
- Wiggins Street/Hamilton Avenue
- Harrison Street (entire length)
- Witherspoon Street (entire length, pictured below)

Mass Transit

Since becoming eligible earlier this summer, **over 70 Princeton graduate students** have enrolled in the **University Mass Transit Subsidy Program**, which provides a 50% subsidy on monthly transit passes. In addition to the subsidy, Transportation & Parking Services offers participants a Guaranteed Ride Home, a program that provides free transportation for participants in case of an emergency.

As of October 2011, 257 members of the University community are participating in the program.

Learn more about the Mass Transit Subsidy Program by visiting the Transportation & Parking Services website or contact Andrea DeRose.
