

## IAC Users Committee

The purpose of the User Committee is to provide an organized framework for the interaction between the Imaging and Analysis Center (IAC) and those who use the facilities in the IAC for their research. The committee meets monthly to conduct the business of the IAC user community, which consists of over 200 researchers from 13 departments and centers on campus.

The primary functions of the committee are to (1) advise the IAC Director on matters affecting the user community, (2) provide a forum for direct discussion and information exchange between the IAC and its users. The mission of the group encompasses information exchange, identification of common concerns and issues requiring IAC responses, resource sharing and exchange, user supports, and focused technical collaboration involving IAC expertise on characterization of materials in a multi-disciplinary environment.
