U.S. Copyright law test

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or other reproduction is not to be “used for any purpose other than private study, scholarship or research.” If a user makes a request for, or later uses, a photocopy or other reproduction for purposes in excess of “fair use,” that user may be liable for copyright infringement.

Dr. John Maclean

Trenton, May 19. 1858

Dear Sir

We send you a sketch of the iron door for the principal entrance to the College. You will perceive the draftsman has made a mistake in the height of the door, which should have been 12 feet high to the spring of the arch, but that will make no difference in the design, all that will have to be done is to alter the length of the panels -

The doors you will perceive are two inches thick, the scale being 1 inch to the foot - the plates will be $\frac{1}{4}$ inch thick - the price will be eight cents (8 cents) per pound

Yours

respectfully
Bottom & Jeffery
