Chapter 1. Introduction and Summary	1
FINDINGS	1
WHY IS MINIATURIZATION IMPORTANT?	4
COMPETITIVENESS OF U.S. MINIATURIZATION TECHNOLOGIES	5
Semiconductors	5
Quantum Effect Devices	7
Molecular and Biological Computing	7
Packaging and Interconnection	8
Biosensors and Chemical Sensors	8
Micro-Mechanical Systems	8
Fabrication Technology Research and Development	10
Chapter 2. Technology	13
INTEGRATED CIRCUITS	13
Physical Limits to Transistor Miniaturization	13
Continuing the Trend in Miniaturization	15
Fabrication Technologies	17
COMPUTING SYSTEMS TECHNOLOGIES	19
Display Technology	23
Data Storage	23
Interconnection and Packaging	23
SENSORS	27
Charge Coupled Devices	27
Chemical and Biological Sensors	28
Micromachined Silicon Sensors	30
ACTUATORS	32
Micro-Electro-Mechanical Actuators	32
Integrating Actuators, Sensors, and Electronics	33
Appendix A. Fabrication Technology for Miniaturization	35
Appendix B. Glossary	43

Boxes

<i>Box</i>	<i>Page</i>
2-A Molecular Machines	20
2-B Bedside Analysis	29
2-C A New Way To Machine	32

Figures

<i>Figure</i>	<i>Page</i>
1-1 How Small Is Small?	2
1-2 Cost of a New Memory Fabrication Facility	3
1-3 Price History of Electronic Logic	4
1-4 Use of Surface Mount Technologies	6
1-5 Semiconductor R&D Spending-Top Four Merchant Companies in the U.S. and Japan	6
2-1 Transistor Trends	14
2-2 Microprocessor Clock Speeds	15
2-3 The Photolithographic Process	18
2-4 Three Approaches to Electronics Miniaturization	22
2-5 Relative Cost of a Chip at Different Levels of Interconnection	25
2-6 Relationship of Die Size and Yield	26
2-7 Impact of Surface Mount Technologies on Calculator Thickness	27
2-8 Cut-away View of a Silicon Pressure Sensor	30
2-B-1 Bedside Analysis	29
2-C-1 Surface Micromachining	32
A-1 Fabrication Sequence for a Metal-Oxide-Semiconductor (MOS) Circuit	36
A-2 Ion Implantation	39
