Recommended Citation:

Foreword

American agriculture is entering a new technological era that holds great promise. Biotechnology and advanced computer systems have the potential to increase productivity, enhance the environment, improve food safety and quality, and bolster U.S. agricultural competitiveness.

Many of these new technologies will be available in the 1990s. But their introduction will be under circumstances unlike any met by past technologies. Uncertainties over these new technologies raise questions of potential impacts on food safety and the environment, and possible economic and social costs. Nevertheless, there will be a push for some of these technologies—biotechnology in particular—to be used commercially, adopted by industry, and accepted by the public.

Congress requested the Office of Technology Assessment to examine emerging technologies that may be available to American agriculture in the 1990s, their potential for industry, and consequent policy issues. This report analyzes the technologies and related policy issues Congress may need to resolve. The analysis includes an assessment of adjustments industry must make to capitalize on the new technologies, the scientific and institutional issues relevant to food safety and environmental risk and benefit, and the implications for intellectual property rights and science policy.

The report concludes that these technologies have the potential to provide new solutions to many agricultural problems. The challenge, however, will be whether government, industry, and the public can strike the proper balance of direction, oversight, and use to allow these technologies to flourish. Congress will be faced with many issues and choices as American agriculture moves into this new era.

This OTA report for Congress is the fourth and final report in a series begun in 1990. The study was requested by the Senate Committee on Agriculture, Nutrition, and Forestry; the House Committee on Government Operations; and the House Committee on Agriculture. The first report issued was Agricultural Research and Technology Transfer Policies for the 1990s, the second report was U.S. Dairy Industry at a Crossroad: Biotechnology and Policy Choices, and the third report was Agricultural Commodities as Industrial Raw Materials. Findings from these reports were relevant to the issues debated for the 1990 Farm Bill.

OTA greatly appreciates contributions of the advisory groups, authors of background papers, reviewers, and other contributors to this study who were instrumental in defining key issues and a range of perspectives on them. Their participation does not necessarily represent endorsement of this report, for which OTA bears sole responsibility.
A New Technological Era for American Agriculture
OTA Project Staff

Roger C. Herdman, Assistant Director, OTA
Health and Life Sciences Division

Walter E. Parham, Program Manager
Food and Renewable Resources Program

Michael J. Phillips, Project Director

Marie Walsh, Senior Analyst
Laura R. Meagher, Senior Analyst
Kevin W. O’Connor, Senior Analyst
Lawrence R. Jones, Analyst
Laura Dye, Research Assistant
Susan Wunder, Editor

Administrative Staff

N. Ellis Lewis, Office Administrator
Nellie Hammond, Administrative Secretary
Carolyn M. Swarm, P.C. Specialist
Assessment Advisory Groups

Advisory Group on Animal Technology and Related Issues

Dale Bauman
Professor
Department of Animal Science
Cornell University

David Berkowitz
Director
Technology Transfer and Coordination Staff
Food Safety Inspection Service
U.S. Department of Agriculture

Roger Blobaum
Director of Americans for Safe Food
Center for Science in the Public Interest

Gary Cromwell
Professor
Department of Animal Science
University of Kentucky

Stanley Curtis
Professor
Department of Animal Science
University of Illinois

Dennis Dykstra
Vice-President of Quality Assurance
Jack Frost Golden Plump Poultry

Terry Etherton
Professor
Department of Dairy and Animal Science
Pennsylvania State University

Don Gill
Regents Professor and Extension Animal Nutritionist
Oklahoma State University

William Hansel
Distinguished Professor
Department of Veterinary Science
Louisiana State University

Michael Hansen
Research Associate
consumer Policy Institute
Consumers Union

Norman Harvey
Farmer
Florence, VT

Burke Healey
southern Cross Ranch
Davis, OK

Walter Hobgood
Director of Animal Nutrition and Health
Monsanto Co.

Maynard Hogberg
Head
Department of Animal Science
Michigan State University

Gerald Isaacs
Chairman
Department of Agricultural Engineering
University of Florida

Daniel D. Jones
Deputy Director
Office of Agricultural Biotechnology
U.S. Department of Agriculture

James Kleibenstein
Professor
Department of Economics
Iowa State University

John Kopchick
Professor
Edison Animal Biotechnology Center
Ohio University

Edward Korwek
Partner
Hogan and Hartson

Darold McCalla
President
Granada Biosciences, Inc.

Tom McGuirk
Associate Professor
Department of Economics
New Mexico State University

Dave Meisinger
Product Manager for New Products
Pitman-Moore, Inc.

Jan E. Novakofski
Associate Professor
Department of Animal Science
University of Illinois

B.I. Osburn
Associate Dean for Research
School of Veterinary Medicine
University of California

Dennis Powers
Director
Hopkins Marine Station
Stanford University

Rodney Preston
Professor
Department of Animal Science
Texas Tech University

Vernon Pursel
Research Leader
Agricultural Research Service
U.S. Department of Agriculture

Allan Rahn
Professor
Department of Animal Science
Michigan State University

Caird Rexroad
Research Leader
Agricultural Research Service
U.S. Department of Agriculture

Tim Rose
Farmer
Lyons, KS

Andrew Rowan
Assistant Dean
School of Veterinary Medicine
Tufts University

Colin Scanes
Professor and Chairman
Department of Animal Science
Cook College, Rutgers University

Thomas Sporleder
Professor
Department of Agricultural Economics and Rural Sociology
Ohio State University

Charles Strong
Extension Biotechnology Coordinator
University of Georgia

Michael Tomaszewski
Professor/Extension Dairy Specialist
Department of Animal Science
Texas A&M University

Edward Veenhuizen
Manager of Animal Science Projects
Lilly Research Laboratories
Eli Lilly and Co.
