Index

œ-thalassemia
carrier frequency among African Americans, 260
carrier screening for, 15, 231, 260
genetics of, 260
incidence among Asian newborns of, 260
stillbirths in Southeast Asia due to, 260
Abortion
cost of, 218
cost-effectiveness and assumptions about, *39-40, 213, 219, 224*
effect on cost-efectiveness of, 40, 223-224
genetic counseling and, 45, 127
prenatal diagnosis of genetic disorders and attitudes toward, 28-29, 127, 190,219, 265
role in controversy over CF carrier screening, 15, 16, 60
Supreme court rulings on, 45, 127
Accreditation, 112-113
Adenosine dearninase deficiency, gene therapy for, 94
Adrenoleukodystrophy, health insurance difficulties and, 34, 200
Adult polycystic kidney disease (APKD)
health insurance difficulties and, 34,200
inheritance pattern of, 87
risk comprehension in families affected by, 143
Adverse selection
genetic tests and potential for, 178
health insurance and, 174
African Americans
ß-thalassemia mutations in, 259
CF carrier frequency among, 14, 145
frequency of α-thalassemia carriers among, 260
frequency of CF live births among, 5,49,90,219
frequency of sickle cell anemia and trait in, 258
frequency of sickle cell anemia live births among, 258
frequency of sickle cell carriers, 258
government interest in addressing sickle cell anemia among, 15,51-52
see also Asian Americans; Caucasian Americans of European descent; Hispanic Americans
Agency for Health Care Policy and Research-DHHS, 43
Alabama
disability statute of, 204
genetic services funding in, 159
Medicaid reimbursement for genetic services in, 183
Alaska
genetic services funding in, 159
Medicaid reimbursement for genetic services in, 183
Albania, frequency of ΔF508 in, 248
Alcohol, Drug Abuse, and Mental Health Administration (AD AMHA), CF-related research funded by, 101, 102
Alcoholics, compulsory sterilization and, 51
Allele specific oligonucleotide (ASO) probes, 11,95,96,98
Alpha-1 -antitrypsin deficiency
gene therapy and, 6, 76
health insurance difficulties and, 34, 200
Alpha-fetoprotein. See Maternal serum alpha-fetoprotein
American Academy of Pediatrics (AAP),119, 144
American Association of BioAnalysts, CLIA accreditation and, 113
American Board of Medical Genetics (ABMG)
certification by, 24, 121
genetic counselors' certification and 4,23,50, 121, 152
American Caucasians of European descent. See Caucasian Americans of European descent
American College of Medical Genetics, 123
American College of Obstetricians and Gynecologists (ACOG)
policy statement on CF carrier screening of, 123
policy statement on MSAFP screening of, 144
regulation of MSAFP test **kits and, 119**
American Medical Association (AMA)
codes of ethics and, 123
policy statement on CF carrier screening of, 123
American Osteopathic Association, CLLA accreditation and, 113
American Society of Human Genetics (ASHG)
MSAFP screening and, 144
policy statement on reproductive options, 127
policy statements on CF carrier screening of, 21, 123, 146
role in 1975 NRC report, 54
role in proficiency testing of, 36, 115
Americans With Disabilities Act of 1990 (ADA)
as a focus of congressional options to address genetic discrumination, 42
definition of disability under, 33-34, 204
health insurance and, 35,42,206-207
relevance to genetics of, 34-35, 51, 202, 205-206
Amiloride, 6,76
Amniocentesis
prenatal diagnosis using, 147
reimbursement under Medicaid for, 28, 182-184
Amplification refractory mutation system (ARMS) multiplex kit, 116,233,234
Arabs, sickle cell mutation in, 258
Arizona
genetic services funding in, 159
hereditary conditions and state law in, 202
Medicaid program in, 182
Arkansas
genetic services funding in, 159
genetics education, technical assistance, and training funding in, 160
Medicaid reimbursement for genetic services in, 183
Artificial insemination, 15, 60, 61
Ashkenazic Jews
frequency of carriers for Tay-Sachs disease among, 121, 254
frequency of ΔF508 in Israeli, 250
frequency of W1282X in, 91
incidence of Tay-Sachs disease among, 254
sensitivity of ΔF508+6 in, 10, 58, 146
Asian Americans
β-thalassemia mutations in, 259
CF carrier frequency among, 14, 145
frequency of CF live births among, 5,49,90,218
see *also* African Americans; Caucasian Americans of European descent; Hispanic Americans
Asian Indians, sickle cell mutations in, 258
Association of Schools of Public Health, 155
Australia
CF screening of newborns in, 73

membership in European Concerted Action on Cystic Fibrosis of, 241
Austria
carrier screening pilot study in, 17, 238, 239
membership in European Concerted Action on Cystic Fibrosis of, 241
Automation
affect on costs of, 37,44
as a factor affecting utilization of CF carrier tests, 20, 37-38
congressional options to address, 40, 43
Human Genome Project funding of, 37,99
impact on CF carrier screening of, 100
of DNA diagnostic procedures, 98-100

β-thalassemia
carrier screening for, 15, 261-263
congressional interest in, 52, 259, 261
ethnic populations affected by, 259, 260
genetics of, 88,260-261
manifestations of, 259-260
State law against discrimination for, 202
Base case, assumptions used in cost-effectiveness, 39,220-221
Baylor College of Medicine
case of health insurance difficulties and CF prenatal screening, 33, 200
cost of CF mutation analysis at, 39, 216
privately funded pilot study at, 19, 161
Belgium
frequency of ΔF508 in, 248
frequency of ΔF508 in Antwerp, 248
membership in European Concerted Action on Cystic Fibrosis of, 241
Biomedical Ethics Advisory Committee, U.S. congressional, 205
Blastomere analysis before implantation (BABI), prenatal analysis using, 147-148
Blindness, compulsory sterilization and, 51
Blue Cross/Blue Shield (BC/BS) plans
1991 OTA survey of, 27-28,31-33,62, 194-195
attitude toward carrier status as preexisting conditions of, 31, 195
attitude toward fairness in using genetic tests of, 177
attitude toward genetic conditions as preexisting conditions of, 31, 195
attitude toward medical information versus genetic information of, 31, 195
attitude toward option of using genetic information of, 177-178
demographics of respondents, 176-177
factors affecting insurability by, 31-32, 195-196
future use of genetic tests by, 32, 197-199
impact of genetic tests on, 32-33, 178
open enrollment under, 171, 172
regulation of, 25, 171
reimbursement for CF carrier tests by, 27, 181
reimbursement of genetic counseling by, 28, 182
structure of, 170-171
see *also* Commercial health insurers; Health insurance; Health insurers; Health maintenance organizations
Boston University, cost of CF mutation analysis at, 39, 216
Bulgaria
frequency of ΔF508 in, 248
membership in European Concerted Action on Cystic Fibrosis of, 241
Bureau of Health Care Delivery and Assistance—DHHS, support for genetics education of nurses by, 155
Bureau of Maternal and Child Health and Resources Development—DHHS, genetics professional education and training support by, 154

California
α-thalassemia carrier screening in, 260
court ruling on Tay-Sachs carrier screening and standard of care, 121-122
genetic services funding in, 159
hereditary conditions and state law in, 202,203
Hereditary Disorders Act of 1990,203
licensing and regulations for DNA laboratories in, 36, 114
Medicaid reimbursement for genetic services in, 183
MSAFP screening in, 151
non-master' s-level counselors and sickle cell programs in, 155
prenatal screening fees as a source of genetic services finding in, 26, 53
reproductive stigmatization and Bree Walker Lampley in, 29, 191
Tay-Sachs carrier screening of Orthodox Jews in, 256
wrongful life claims in, 130
Canada
β-thalassemia carrier screening in, 261
CF carrier screening pilot study in, 19,29,150, 162,191-192
ELSI grant to survey views of genetic specialists in, 55
frequency of ΔF508 in, 91,247,253
median CF survival data from, 6, 77
Tay-Sachs carrier screening in, 254,255, 256,257
Tay-Sachs carrier screening of Orthodox Jews in Montreal, 256
Caregiving, costs of, 38,215-216
Carrier. See Carrier screening; Carrier status; Cystic fibrosis carrier screening
Carrier screening
definition used in OTA report of, 4,50
for β-thalassemia, 259-263
for sickle cell trait, 258-259
for Tay-Sachs, 255-257
goals of, 57
value of, 45, 54, 213-214, 226
see *also* Cystic fibrosis carrier screening
Carrier status
ADA and, 35,205, 206
frequency among Caucasians of positive CF, 3, 10,58,90
health insurers' attitudes toward, 31, 195,200
number of Americans with positive CF, 8, 49, 90
stigmatization of, 28-29, 189-192
Carrier testing
definition used in OTA report of, 4,50
see *also* Cystic fibrosis carrier testing
Caucasian Americans of European descent
carrier frequency of CF among, 14, 58,90, 121, 145
carrier frequency of Tay-Sachs disease among, 121
frequency of CF live births among, 5,49,90, 121
see *also African Americans;* Asian Americans; Hispanic Americans

  McGann v. H & H Music Co., 194
  Planned Parenthood of Southeastern Pennsylvania v. Casey, *45, 127*
  Roe v. Wade, 45, 127
  Rust v. Sullivan, *45, 127*
Survey
  by OTA of American public attitudes toward genetic tests and gene therapy, 20,62-63,94
  by OTA of Fortune 500 companies of other employers, 30,42, 192
  by OTA of genetic counselors and nurses in genetics, 21,24, 33,62, 121, 123, 141, 145, 148, 149, 150, 151, 153, 154, 180, 199-202
  by OTA of health insurers, 26-33, 62, 176-180, 193-199
Survival, 77-78
Sweat glands, effect of CF on, 69, 71
Sweat test, 4, 72
Sweden, membership in European Concerted Action on Cystic

Fibrosis of, 241
Switzerland
frequency of ΔF508 in, 251
membership in European Concerted Action on Cystic Fibrosis of, 241

Target population. See Population target
Tay-Sachs disease
1983 report of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research and, 54
California court ruling and standard of care for carrier screening of, 121-122
carrier frequency of, 121
carrier screening for, 15, 231, 255-257
congressional interest in, 52
genetics of, 15,88,254-255
manifestations of, 254
State law against discrumination for, 202
stigmatization and carriers for, 190, 191
Tennessee
genetic services funding in, 159
genetics education, technical assistance, and training funding in, 160
Medicaid reimbursement for genetic services in, 183
Tay-Sachs carrier screening of Orthodox Jews in, 256
Terminology, used in OTA report, 4,49-50
Test kits
congressional options for regulation of, 40, 42-43
importance to CF carrier screening of, 37, 132
regulation of DNA, 37, 116-120, 132
regulatory future of CF mutation, 37, 118-120, 132
Testing
definition used in OTA report of genetic, 4,49-50
see *also* β-thalassemia; Cystic fibrosis carrier screening; Cystic fibrosis carrier testing; Screening; Sickle cell anemia; Tay-Sachs disease
Tests
automation of, 37-38, 98-100
CF functional tests, 9,93
to detect CF mutations, 9-11,58-59, 95-100
to detect genetic disorders, 85
to diagnosis CF, 72-73
Texas
genetic services funding in, 159
McGann v. H & H Music Co., 194
Medicaid reimbursement for genetic services in, 183
Thalassemia. See α-thalassemia; β-thalassemia
Therapy
costs of, 38, 214-216
current CF, 5, 73-77
future CF, 6,76,93
impact in improvements on cost-effectiveness of new, 213, 225
see *also* Gene therapy; Prognosis; Treatment
Training
as a factor affecting utilization of CF carrier tests, 20, 24-25
congressional issues and options for professional education and, 40,4142
lack of Federal funding for genetic services-related, 25,52
professional continuing education and, 24, 154
SPRANS funding for, 26, 160
see *also* Education
Transcription, 8,86,89,92
Translation, 8, 86,89,92
Treatment
chest physical therapy, 5, 76
costs of, 38, 214-216
digestive therapy, 75
effect on cost-effectiveness of costs of, 213
lung therapy, 73-75
transplants, 77
see *also* Gene therapy; Prognosis; Therapy
Trends
in number of nonresearch carrier tests, 61
in number of research carrier tests, 61
in therapy for CF, 76, 93, 94
in total number of carrier tests, 18, 20, 61
Tuberculosis, compulsory sterilization and, 51
Tulane University, 257
Turkey
frequency of ΔF508 in, 251
sickle cell mutation in, 258
Turner's syndrome, health insurance difficulties and, 34,200

Ultrasound, reimbursement under Medicaid for, 28, 182-184
Underwriting, health insurance and, 25-26, 32, 172, 174, 176, 193
Union of Soviet Socialist Republics (USSR; former)
frequency of ΔF508 in, 251
frequency of ΔF508 in Moscow/Odessa, 251
membership in European Concerted Action on Cystic Fibrosis of, 241
United Kingdom
CF carrier screening in the United States compared to, 17, 241-242
CF carrier screening pilot programs in, 17,233-239
eugenics movement in, 51
Fragile X screening proposed in, 265
frequency of ΔF508 in, 251
frequency of ΔF508 in England, 231,251
frequency of ΔF508 in Northern Ireland, 252
frequency of ΔF508 in Scotland, 231,252
genetic services in, 231-233
MSAFP screening in, 119
outlook for CF carrier screening in, 240-241
public attitudes toward, 17,239
role of CF trust in CF carrier screening, 233-238
role of MRC in CF carrier screening, 232-233
United States
α-thalassemia carrier screening in, 260
β-thalassemia carrier screening in, 261
eugenics movement in, 51
frequency of common CF mutations in, 253
frequency of ΔF508 in, 58,253
sickle cell screening in, 258-259
Tay-Sachs carrier screening in, 255-257
see *also* Cystic fibrosis; Cystic fibrosis carrier screening; Federal Government; States
University Hospital of Wales—Cardiff, CF carrier screening pilot program at, 17,233-234,235,237,239
University of California, Los Angeles (UCLA), School of Medicine, NIH-funded pilot study at, 18, 158
University of Miami School of Medicine, 256

University of Minnesota, cost of CF mutation analysis at, 39,216
University of North Carolina
  cost of CF mutation analysis at, 39, 216
  NIH-funded pilot study at, 18, 157
University of Padua—Italy, 238, 239
University of Pennsylvania
  cost of CF mutation analysis at Hospital of, 39, 216
  NIH-funded pilot study at, 18, 158
University of Rochester, NIH-funded pilot study at, 18,157-158
University of Vienna-Austria, 239
Utah
  genetic services funding in, 159
  genetics education, technical assistance, and training funding in, 160
  Medicaid reimbursement for genetic services in, 183

Vanderbilt University, NH-tided pilot study at, 18, 157
Vermont
  genetic services funding in, 159
  Medicaid reimbursement for genetic services in, 183
Virginia
  genetic services funding in, 159
  hereditary conditions and state law in, 202
  mandatory reporting of birth defects in, 128
  Medicaid reimbursement for genetic services in, 183
  sterilization law of, 51
Vivigen, Inc.
  cost of CF mutation analysis by, 39, 216
  privately funded pilot study and, 19, 162-163

Wales
  CF carrier screening pilot program in, 17,233-234,235,237
  membership in European Concerted Action on Cystic Fibrosis of, 241
  see also United Kingdom
Walker Lampley, Bree, 29, 191
Washington
  genetic services funding in, 159
  genetics education, technical assistance, and training finding in, 160
  mandatory reporting of birth defects in, 128
  Medicaid reimbursement for genetic services in, 183
  wrongful life claims in, 130
West Germany (former). See Germany
West Virginia
  genetic services funding in, 159
  genetics education, technical assistance, and training funding in, 160
  mandatory reporting of birth defects in, 128
  Medicaid reimbursement for genetic services in, 183
Western General Hospital-Edinburgh
  CF carrier screening pilot program at, 17,233,234,236,238, 239
  MRC funding for CF carrier screening pilot program at, 233
Wisconsin
  CF screening of newborns in, 4,50,73, 150
  genetic services funding in, 159
  genetics education, technical assistance, and training funding in, 160
  hereditary conditions and state law in, 202
  mandatory reporting of birth defects in, 128
  Medicaid reimbursement for genetic services in, 183
World Health Organization, 260,262
Wrongful birth
  claims and compensation, 23, 130, 131
  definition of, 130
  State statutes on, 130
Wrongful life
  claims and compensation, 23, 130, 131
  definition of, 130
  State statutes on, 130-131
Wyoming
  genetic services funding in, 159
  genetics education, technical assistance, and training funding in, 160
  Medicaid reimbursement for genetic services in, 183

X chromosome
  in females, 85
  in males, 85
  role in Fragile X syndrome, 265
  role in X-linked inheritance, 88, 89, 90

Y chromosome
  genetic disease and, 88
  in males, 85
Yellowstone National Park, 97
Yugoslavia (former)
  frequency of ΔF508 in, 252
  frequency of ΔF508 in Macedonia, 252
  frequency of ΔF508 in Slovenia, 252
  frequency of ΔF508 in Southern, 252
  membership in European Concerted Action on Cystic Fibrosis of, 241
