

Contents

1 Introduction and Summary 1

- Energy Technologies 3
- Environmental Technologies 10
- The Political, Economic, and Social Context for Effecting Change 12
- Current U.S. Programs Promoting Cooperation 15
- U.S. Policy Goals and Options 17
- Conclusion 22

2 Overview of Energy Supply and Demand 23

- Energy's Role in the Economy 23
- Energy Supply 24
- Energy Demand 34

3 Fossil Fuel Technologies 39

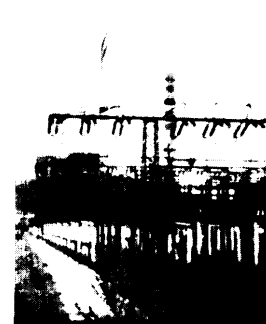

- Oil and Natural Gas 40
- Coal Mining and Beneficiation 58
- Coalbed Methane 64
- Appendix 3-1: Experience with Joint Ventures-Dresser Industries 67
- Appendix 3-2: Case Study: Custom Coals Corp. 68

4 Non-Fossil Fuel Technologies 73

- Nuclear Power Technologies 73
- Electric Power Technologies 87
- Renewable Energy Technologies 98

5 Energy-Based Environmental Technologies 107

- Regulatory Framework 108
- Energy Production, Processing, and Transportation 109
- The Environmental Impacts of Fuel Consumption 116
- Outlook for U.S. Technology Transfer 127
- Conclusions 130

6 The Political, Economic, and Social Context of Reform 131

The Vanguard: Countries in the First Tier of Reform **132**

Slow Reformers: Countries in the Second Tier of Reform **136**

Foot-Draggers: Countries in the Third Tier of Reform 143

Building New Societies-The Culture of Reform 147

7 Assistance, Trade, and Investment Programs 149

Barriers to Energy Sector Development 149

Evaluation of U.S. Programs 153

Survey of Energy and Environmental Programs 156

8 U.S. Goals And Policy Options 173

U.S. National Goals 173

Policy Options 175

Policy Strategy 192

Conclusion 195
