

Contents

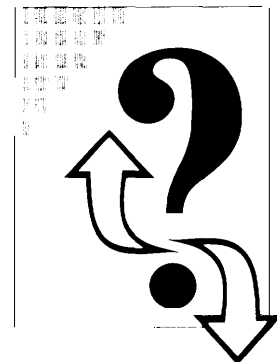

1 Summary 1

- Summary of Findings and Conclusions 3
 - Effectiveness Research 4
 - Cost-Effectiveness Analysis 7
 - Health Technology Assessment and Clinical Practice Guidelines 9
 - Changing Clinical Practice 11
- Options for Advancing the Federal Effort 12
 - Filling the Gaps in Effectiveness and Cost-Effectiveness Research 12
 - Clarifying the Federal Role in Health Technology Assessment 14
 - Improving Clinical Practice Guideline Development 15
 - Directing and Coordinating the Overall Federal Effort 16

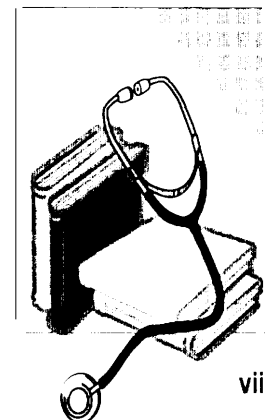

2 Behind the Search for Evidence 19

- The Need for Evidence 20
- A Framework for Evaluation 22
- The Shaping of Effectiveness Research 26
 - Geographic Variation in Medical Practice 26
 - Outcomes of Patient Care 28
 - Appropriateness of Care 30
 - The Federal Medical Treatment Effectiveness Program 33
- Expectations in the Context of National Health Reform 34
- Conclusions 37

3 Tools for Effectiveness Research 39

- Techniques To Evaluate Health Effects 40
 - Basic Tools for Measuring Health Outcomes 40
 - Primary Studies To Evaluate Health Effects 43
 - Secondary Techniques To Synthesize Results 59
- Applying the Tools: The Patient Outcomes Research Teams 67

Contributions	68
Limitations and Frustrations	72
Future Plans	73
Conclusions	73

4 Issues in Improving Effectiveness Research 77

Gaps in the Existing Federal Research Effort	77
Systematic Reviews: Making Use of Existing Knowledge	78
Filling In the Knowledge Gaps	82
The Comparative Evaluation of New Technologies	90
Issues in Federal Funding and Support	95
The Roles of the Federal Agencies	95
Coordinating Research Activities	102
Conclusions	104

5 The State of Cost-Effectiveness Analysis 107

Analytic Approaches	107
Uses of Cost-Effectiveness Analysis	108
Mechanics of Cost-Effectiveness Analysis	110
Issues in the Use of Cost-Effectiveness Analyses	111
Comparability	112
Quality of Analyses	114
Prospective Analyses: Clinical-Economic Trials	116
Underlying Assumptions of Cost-Utility Analysis	118
Federal Cost-Effectiveness Activities	122
Agency for Health Care Policy and Research	122
National Institutes of Health	122
Centers for Disease Control and Prevention	123
Health Care Financing Administration	124
Office of Disease Prevention and Health Promotion	125
Cost-Effectiveness Analysis in the Private Sector	125
Recent Trends	125
Issues	126
Conclusions	127

6 The Federal Role in Health Technology Assessment 131

- Growth of Health Technology Assessment 132
 - Debating the Federal Role 132
 - Health Technology Assessment in the Private Sector 135
 - Clinical Practice Guidelines and Technology Assessment 139
- Conclusions 141

7 The Development of Clinical Practice Guidelines 145

- Federal Guideline Efforts 145
- Private Efforts 146
- Guideline Issues Related to Development 147
 - Overview 147
 - Choosing Guideline Topics 149
 - Selecting Guideline Panels 151
 - Defining the Scope of Guidelines 153
 - Identifying and Synthesizing Evidence 155
 - Techniques To Aid Group Interaction and Decisionmaking 157
 - The Basis for Guideline Recommendations 164
 - Organization and Administration of Guideline Activities 166
 - Methodological Research 168
- Conclusions 168
 - The Link Between Methods and Recommendations 168
 - Developing Methods To Prioritize Guideline Topics 169
 - Research Needs 170

8 The Impact of Clinical Guidelines on Practice 173

- Anatomy of Physician Behavior 173
 - Modeling Clinical Decisionmaking 173
 - Sources of Influence on Physician Practice 175
- Approaches To Changing Clinical Practice 177
 - Passive Dissemination 177
 - Active Approaches 179
 - Lessons from the Literature 187
- Implementing Clinical Practice Guidelines 190
 - Impact of Guidelines on Clinical Practice 190
 - Factors Influencing the Impact of Guidelines 195
- Conclusions 197

APPENDIXES

- A How This Study Was Conducted 199**
- B Acknowledgments 203**
- C Guideline Development Activities 210**
- D Abbreviations and Glossary 237**
- References 247**
- Index 295**
