

Appendixes

Methods and Acknowledgments

The study is based on an analysis of information obtained from an extensive review of the literature and from individuals and organizations with relevant experience. An advisory panel of experts with backgrounds in health policy, medical economics, health insurance, medicine, nursing and consumer advocacy defined the goals for the study and suggested source material, subject areas, and perspectives to consider in presenting the material. The drafts of the report were revised to reflect the thoughtful comments of the panel. OTA thanks the panel for its assistance and the following people and organizations for supplying information and reviewing drafts.

Joel J. Alpert Boston City Hospital Boston, MA	Carl Fasser Baylor University Houston, TX	Kerry Kemp Office of Technology Assessment Washington, DC
American Nurses Association Washington, DC	William Finefrock American Academy of Physician Assistants Arlington, VA	Cynthia P. King American Medical Association Chicago, IL
