# CONTENTS

CHAPTER 1: SUMMARY AND CONCLUSIONS ................................................................. 3
   Introduction ........................................................................................................ 3
      Scope of the Case Study ................................................................................. 3
      Organization of the Case Study ...................................................................... 4
   Summary ............................................................................................................ 4
      Supply, Use, and Costs .................................................................................... 4
      Mortality and Morbidity .................................................................................. 4
      Financing .......................................................................................................... 5
      Access ............................................................................................................. 6
      Cost-Effectiveness ............................................................................................ 7
   Conclusions .......................................................................................................... 7

CHAPTER 2: SUPPLY, USE, AND COST OF NEONATAL INTENSIVE CARE ........ 11
   Introduction ........................................................................................................ 11
   supply ................................................................................................................ 11
   Utilization .......................................................................................................... 12
   cost..................................................................................................................... 14

CHAPTER 3: EFFECTIVENESS OF NEONATAL INTENSIVE CARE .................. 21
   Introduction ........................................................................................................ 21
   Mortality Rates .................................................................................................. 21
   Handicap Rates .................................................................................................. 25
   Neonatal Conditions That Cause Major Mortality and Morbidity ................. 31
      Respiratory Distress Syndrome ..................................................................... 31
      Intraventricular Hemorrhage ......................................................................... 35
      Retinopathy of Prematurity ............................................................................ 37

CHAPTER 4: FINANCING NEONATAL INTENSIVE CARE .................................... 41
   Introduction ........................................................................................................ 41
   Reimbursement Practices .................................................................................. 42
   Medicaid ............................................................................................................ 43
      Policies ............................................................................................................ 43
      Expenditures for Neonatal Intensive Care ...................................................... 43

CHAPTER 5: ACCESS TO NEONATAL INTENSIVE CARE .................................. 47
   Introduction ........................................................................................................ 47
   Level 11 Hospitals .............................................................................................. 49
   Concentration of Births in Level III Hospitals .................................................. 50
   Barriers to Maternal and Neonatal Transport .................................................. 52
   The Tiniest Babies .............................................................................................. 53

CHAPTER 6: ECONOMIC ANALYSIS OF NEONATAL INTENSIVE CARE ....... 57
   Introduction ........................................................................................................ 57
   Cost-Effectiveness and Cost-Benefit Studies ..................................................... 57
   Conclusions and Policy Implications ................................................................. 59

APPENDIX A: GLOSSARY OF ACRONYMS AND TERMS ............................... 63
APPENDIX B: ACKNOWLEDGMENTS ................................................................. 65
REFERENCES ......................................................................................................... 69

CONTENTS—continued

Box
A. How To Interpret the Data in Tables 3, 4, and 5. ................................. 15

Figures
1. Hospital Cost by Birthweight Group, 1984 ........................................ 16
2. Outcomes for Very Low Birthweight Infants (<1500 grams) Born in Level III Hospitals, 1960-85 ........................................ 30
3. Outcomes for Extremely Low Birthweight Infants (=1000 grams) Born in Level III Hospitals, 1960-85 ........................................ 31

Tables
1. Supply of NICUs and Beds in the United States, 1983 ........................ 12
2. NICU Days of Care and Occupancy in the United States, 1983 ............ 13
3. Length of Stay by Birthweight Group, 1984 ...................................... 13
4. Hospital Cost by Birthweight Group, 1984 ........................................ 14
5. Hospital Cost and Length of Stay Per Very Low Birthweight Survivor, 1984 ........................................ 16
6. Hospital Cost and Length of Stay for Newborns Requiring Assisted Ventilation, 1984 ........................................ 17
7. Comparative Neonatal Mortality for Very Low Birthweight Infants Born in Level III Hospitals, 1975-85 ....................... 23
8. Comparative Neonatal Mortality in NICUs for Very Low Birthweight Infants, 1975-85 ........................................ 24
9. Inborn Neonatal Mortality Rates for Very Low Birthweight Infants, Pooled Institutional Data ........................................ 25
11. Handicap Rates in Infants With Birthweights Between 750 and 1000 Grams, 1975-85 ........................................ 28
12. Handicap Rates in Infants With Birthweights Between 1000 and 1500 Grams, 1975-85 ........................................ 29
14. Regional Neonatal Mortality Rates for Very Low Birthweight Infants, 1976-81 ........................................ 47
15. Concentration of Births of Infants Weighing Less Than 1500 Grams in Level III Hospitals ........................................ 51
16. Measures of Economic Evaluation of Neonatal Intensive Care for Very Low Birthweight Infants (5 Percent Discount Rate), 1984 ........................................ 58
17. Cost of Neonatal Intensive Care Per Additional Survivor, 1984 ........... 59
