

# Index

- Acquisitions
  - among automotive support industries, 178
  - Japanese industrial, 211-212
  - in U.S. advanced materials industry, 208, 209, 224-225, 237, 238, 241, 246
  - in Western European advanced materials markets, 217, 233, 244, 248
  - see *a/s* Joint ventures
- Advantages of advanced materials. See Performance
- Aerospace industry. See Aircraft industry; Military; Space industry
- Aircraft industry
  - ceramics use in, 11
  - investment approach of, 190-191
  - MMCs use in, 110-111, 112, 113, 114, 141
  - PMCs use in, 73, 80, 81, 83-85, 141, 142-143
  - substitution potential in, 18, 141-144
- Aluminum industry. See Metals industries
- Antitrust, 297
- Applications
  - for ceramics products, 10-12, 37, 38, 50-52
  - MMCs tailorability to specific, 100, 106
  - for MMCs, 13-14, 112-115
  - for PMCs, 12-13, 73-74, 78, 155-184
  - see *also* Markets
- Australia, 90
- Automation
  - of design and processing technologies, 16, 79-81, 128-131, 169, 170
  - implementing, 16, 131-134
  - NDE techniques compatible with, 49
  - PMC use in, 16, 86
- Automotive industry
  - ceramics use by, 11, 58-64
  - impacts of new processing technologies on, 19, 173-177
  - impact on support industries of new PMCs, 178-181
  - investment approach of, 190
  - MMCs use by, 14, 99, 104, 106, 107-108, 111, 112, 113, 114
  - PMC fabrication possibilities for, 165-173
  - PMCs use in, 73, 75, 85-86, 144-146, 155-184
  - R&D on PMCs by, 19, 93, 156, 169, 182-183
  - substitution potential in, 18, 144-146
- Barriers
  - to automation of design and processing technologies, 131-134
  - to ceramics applications, 10-11, 37-38, 38-39, 42, 56, 57-58
  - industry's view of, 194-198
  - labor costs as, 19, 80
  - to MMCs use, 13-14, 15, 99, 100-102, 103-104, 105-106
  - national security effects as, 23-24, 28-29, 238, 260-261, 269-270, 271, 286, 287, 292-294
  - to PMC applications, 12, 13, 18, 19, 73, 80, 86, 88-89, 93-95, 156, 160, 182-183
  - to PMCs use in automotive industry, 19, 86, 155, 156, 160, 167-168, 169, 173, 182-183
- Belgium, national R&D program in, 220
- Bioceramics industry, 11, 37, 56-57, 65-66
- Biomedical industry
  - investment attitudes of, 191
  - PMCs use in, 73, 89-90
- Biotechnology industry, 92, 264
- Budgets
  - advanced ceramics R&D, 21, 22, 69, 70, 203-204, 219-220
  - Federal laboratories, 256
  - MMCs R&D, 23, 115, 205, 238, 239
  - PMCs R&D, 93, 229, 230, 234-235, 236
  - see *a/s* Costs; Expenditures; Funding
- Canada
  - offsets and, 285
  - PMC applications in, 90
  - reexport restrictions by, 277
  - standards development by, 127
- Cement
  - additives in, 47-48
  - applications using, 54
- Ceramic matrix composites (CMCs)
  - future trends for, 64-65, 270, 283
  - properties of, 10, 37, 40-41, 44, 68
  - R&D for, 12, 38, 45, 66-70
- Chemically bonded ceramics (CBCs), 47-49, 69
- China, 88
- Clayton Act, Section 7 (15 U.S.C. 18), 297
- Coatings
  - advantages of ceramic, 10, 37, 41-42
  - markets for ceramic, 54, 61
  - of MMCs, 102
  - PMC, 151
  - processes for the production of ceramic, 45-46
- Collabssoration
  - commercialization as goal of research, 262-263
  - coordination of R&D programs for, 256, 258
  - facilitation of government/university/industry, 3, 27, 28, 291, 295, 296-298
  - government/industry in Western Europe, 234, 239

- Japanese government/industry, 1, 2, 57, 213-216, 229-230  
 program goals, 251, 252, 261-263  
 U.S. Government/industry, 24-25, 26, 57, 209-210, 226, 303-304  
 see also Commercialization; Research and Development (R&D)
- Commercialization**  
**Australian efforts toward, 90**  
**Canadian efforts toward, 90**  
**Chinese efforts toward, 88**  
**English efforts toward, 88, 90, 113, 219, 230, 236, 240**  
**effective exploitation of military R&D**  
 investments, 3, 27, 28-30, 291, 298-303  
 French efforts toward, 57, 90, 219, 230, 236, 240  
 industrial investment criteria, 191-192, 193-194  
 Israeli efforts toward, 88  
 Italian efforts toward, 90, 220, 230  
 Japanese efforts toward, 1, 2, 14, 50-52, 57, 59, 61, 62, 86, 88, 90, 99, 104, 106, 107-108, 111, 112, 211, 227, 238  
 of MMCs, 113-115, 141  
 of PMCs, 12-13, 74-75, 82, 83, 88, 141, 142-143, 155-184  
 of R&D results, 251, 252, 253, 261, 262-264  
 Swiss efforts toward, 88  
**West German effort toward, 52, 57, 62, 88, 90, 230**  
 see *also* **Applications; Barriers; Markets; Research and Development; individual end-user industrial sectors**
- Computerization. See Automation**
- Concrete**  
 additives in, 48-49  
 applications of, 54-56, 147-148
- Consortia**  
 industrial, 256  
 university-based, 251, 255, 257, 259
- Construction industry**  
 advanced materials for, 11, 37, 49, 55-56, 74, 87-89  
 investment attitudes of, 189-190  
 substitution potential in, 18, 147-148
- Container industry, 18, 73, 148-149**
- costs**  
 of advanced PMC materials, 75, 84, 87, 142, 160, 282  
 of advanced PMC parts, 12, 75, 80, 86  
**ceramic materials, 49, 54, 56**  
 ceramic parts, 37, 52, 58  
 consideration of, for automation, 131, 132, 133  
 effects of, on supply, 138  
 fuel, 17, 124, 142, 182
- liability, 196-197  
 life-cycle, 17, 83, 124, 142  
 of MMC materials, 13, 14, 99, 100, 101, 105-106, 110-111, 116  
 of MMC parts, 110-111, 237  
 of MMC processing methods, 13, 14, 99, 105-106, 107-108, 109, 110, 115-116, 117  
 of materials properties data development, 127  
 as motivation for materials substitution, 141, 147-148  
 of overdesign, 79  
 parts consolidation resulting in lower assembly, 12, 86, 142, 176-177  
 systems approach to 17, 88, 123-124  
 of testing, 111, 197-198, 283-284
- Cost effectiveness**  
 of automation, 1, 2, 58, 129, 133  
 of high-strength concrete, 147-148  
 of MMCs, 105, 111  
 of production level NDE techniques, 49, 50  
 of PMC use in aircraft, 83
- Critical Agricultural Materials Act-1984 (Public Law 98-284), 92**
- Data**  
 materials safety, 50, 111-112  
 MMCs property, 100  
 PMC energy absorption, 162-164
- Databases**  
 automation's dependence on, 15, 128, 131, 132-133, 134
