## Contents

Chapter 1. Overview . . . . .	1
Chapter 2. Findings . . . . .	3
Chapter 3. Oil Spill Response Technologies . . . . .	11
Introduction . . . . .	11
Mechanical Spill Response Technologies . . . . .	12
Dispersants . . . . .	19
Burning, Bioremediation, and Other Techniques . . . . .	22
Quantity and Distribution of Response Equipment . . . . .	24
Chapter 4. U.S. Oil Spill Response Issues . . . . .	27
Introduction . . . . .	27
Technology: Which Cleanup Method? . . . . .	27
Decisionmaking: Democratic and Authoritarian Approaches . . . . .	28
Responsibility: The Polluter or the Government? . . . . .	28
Logistics: Essential to Quick Response . . . . .	29
Beach Cleanup: How Much Emphasis? . . . . .	30
Federal Regulations and Emergency Situations . . . . .	31
Equipment Testing: How Realistic? How Effective? . . . . .	32
Personnel, Training, and Drills . . . . .	33
Research and Development . . . . .	34
Chapter 5. Selected European Oil Spill Policies . . . . .	39
Introduction . . . . .	39
French Oil Spill Policy . . . . .	39
Dutch Oil Spill Policy . . . . .	41
United Kingdom Oil Spill Policy . . . . .	43
Norwegian Oil Spill Policy . . . . .	44
General Comments . . . . .	46
Appendix A. Mechanical Containment and Cleanup Technologies . . . . .	51
Appendix B. Quantity and Distribution of U.S. Equipment . . . . .	58
Appendix C. Acknowledgments . . . . .	68
Appendix D. Acronyms . . . . .	70

# Contents

<i>Figure</i>	<i>Figures</i>	<i>Page</i>
3-1.	Spread of an Exxon Valdez-Sized <i>Oil</i> Spill . . . . .	11
3-2.	Vessel-of-Opportunity Skimming System . . . . .	17
3-3.	West German THOR. . . . .	18
3-4.	Schematic Drawing of the Navy's Class V Oil Skimmer . . . . .	18
A-1.	Components of a Boom. . . . .	51
A-2.	Weir Skimmer . . . . .	52
A-3.	Floating Suction Skimmer . . . . .	53
A-4.	Schematic Drawing of a Weir Skimmer . . . . .	53
A-5.	Vortex Skimmer . . . . .	53
A-6.	Disc Skimmer . . . . .	54
A-7.	Rope Mop Skimmer. . . . .	55
A-8.	Paddle Belt Skimmer . . . . .	56
A-9.	Sorbent Belt Skimmer . . . . .	56
A-10.	Sorbent Lifting Belt Skimmer . . . . .	56
A-n.	Submersion Belt Skimmer . . . . .	57

<i>Table</i>	<i>Tables</i>	<i>Page</i>
2-1.	Large Oil Spills: A List of 66 Spills Greater Than 2 Million Gallons, 1967 to Present . . . . .	4
3-1.	Equipment Required To Deploy Response Elements . . . . .	20
4-1.	Suggestions Received by the Coast Guard . . . . .	36
4-2.	Selection of Planned R&D Efforts by Federal Agencies and Industry . . . . .	38
5-1.	Summary of Oil Spill Response Arrangements . . . . .	47
A-1.	Boom Classification According to Freeboard and Draft . . . . .	52
B-1.	Major Types, Quantities, and Location of U.S. Navy Spill Response Equipment . . . . .	59
B-2.	Major National Strike Force Equipment of the U.S. Coast Guard . . . . .	59
B-3.	Major Sources of Skimmers in the United States . . . . .	60
B-4.	Major Sources of Containment Boom in the United States . . . . .	61
B-5.	Major Sources of Offloading Pumps in the United States . . . . .	62
B-6.	Major Sources of Dispersant Delivery Systems in the United States . . . . .	63
B-7.	Alyeska Response Equipment . . . . .	<b>64</b>
B-8.	Equipment Based at the Oil Spill Response Center, Southampton, U.K. . . . .	64
B-9.	Petroleum Industry Response Organization Regional Center Capital Equipment Cost . . . . .	66
B-10.	U.S. Oil Spill Co-Ops . . . . .	67
