Executive Summary	1
OVERVIEW	1
Meeting Society's Goals	3
Other Key Issues	4
SUMMARY AND CONCLUSIONS	4
The Perceived Benefits of Alternative Fuels	6
Introducing Alternative Fuels Into the Light Duty Fleet	11
Chapter 1. Introduction	23
Chapter 2. Why Support Alternative Fuels?	31
OZONE CONTROL IN PERSPECTIVE	31
Why Control Ozone?	32
Ozone and Its Precursors	33
Controlling Volatile Organic Compounds	34
Controlling Nitrogen Oxides	40
The Role of Alternative Fuels	40
ENERGY SECURITY IN PERSPECTIVE	42
Should Energy Security Be a Major Concern for U.S. Policymakers?	42
Energy Security Effects of Alternative Fuels	48
THE GREENHOUSE EFFECT IN PERSPECTIVE	49
Introduction	49
Key Uncertainties	50
Benchmarking: The Effect of Doubled CO ₂	53
Reducing CO ₂ Emissions in the Near-Term	53
The Transportation Sector and Global Warming	54
U.S. Transportation Energy Use and CO ₂ Emissions	55
Alternative Fuels	56
Chapter 3. Substituting Methanol for Gasoline in the Automobile Fleet	59
EFFECTS ON AIR QUALITY	60
Organic Compounds and Ozone Reduction	61
Nitrogen Oxides (NO _x)	69
Carbon Monoxide	69
Toxic Emissions	70
Greenhouse Emissions	71
OTHER ENVIRONMENTAL/SAFETY EFFECTS	72
COST COMPETITIVENESS	73
INFRASTRUCTURE	79
ENERGY SECURITY IMPLICATIONS	80
METHANOL OUTLOOK AND TIMING	83
APPENDIX 3A: FACTORS AFFECTING METHANOL COSTS	84
Feedstock Costs	84
Production Costs	87
Capital Charges	88
Long-Distance Shipping	92
Distribution Costs	92
Retail Markup	93
Methanol/Gasoline Conversion Factor	93
Chapter 4. Natural Gas as a Vehicle Fuel	97
VEHICLES	97
EFFECTS ON AIR QUALITY	99
SAFETY	101
COST COMPETITIVENESS	101
SOURCES OF SUPPLY AND STRATEGIC CONSIDERATIONS	102
REFUELING AND INFRASTRUCTURE	103
NATURAL GAS OUTLOOK AND TIMING	104
Chapter 5. Ethanol as a Gasoline Blending Agent or Neat Fuel in Highway Vehicles	107
EFFECTS ON AIR QUALITY	107

COST COMPETITIVENESS	108
ENERGY AND ENVIRONMENT' EFFECTS	111
DEMAND LIMITS	114
ETHANOL OUTLOOK AND TIMING	114
Chapter 6. Electric Vehicles	117
VEHICLE CHARACTERISTICS	117
ADVANCED TECHNOLOGY	118
MARKET COMPETITIVENESS	119
HYBRID VEHICLES	120
INFRASTRUCTURE	122
EFFECTS ON EMISSIONS AND AIR QUALITY	123
ELECTRICITY OUTLOOK AND TIMING	124
Chapter 7. Hydrogen as a Vehicle Fuel	127
FUEL SOURCE	127
VEHICLES AND FUEL STORAGE	127
EMISSIONS AND PERFORMANCE ATTRIBUTES	128
SAFETY	128
DEVELOPMENT REQUIREMENTS	128
COST COMPETITIVENESS	129
HYDROGEN OUTLOOK AND TIMING	130
Chapter 8. Reformulated Gasoline	131
ARCO'S "EMISSION CONTROL 1" GASOLINE	132
REFORMULATION POTENTIAL	132
COSTS	134
SECONDARY IMPACTS	136
ADDITION OF OXYGENATES	136

Boxes

<i>Box</i>	<i>Page</i>
A. Alternative Transportation Fuels	5
1-A. Comparing Vehicles Fueled With Gasoline and Alternative Fuels	29
2-A. Greenhouse Gases	51
3-A. How Does EPA Arrive at Its Estimates for the Ozone-Reduction Impact of Methanol Vehicles?	62
6-A. GM's Impact: A Niche Vehicle	121
8-A. What Is Reformulated Gasoline	149

Figures

<i>Figure</i>	<i>Page</i>
1. Volatile Organic Compound (VOC) Emissions in Nonattainment Cities in 1994, by Source Category, After All Additional Control Methods Are Applied	7
2. EIA Projections of Petroleum Supply, Consumption, and Import Requirements to 2010, Base Case	8
3. World Exportable Gas Surplus as of Dec. 31, 1987	9
4. Technical Differences Between Flexible-Fuel and Conventional Automobiles	12
5. Potential Low-Cost Suppliers of Methanol	14
6. Converting Methane to Methanol	17
7. Effect of Electricity Source on Greenhouse Impact of Electric Vehicles	21
2-1. Acute Effects of Ozone Exposure	33
2-2. Areas Classified as Nonattainment for Ozone Based on 1983-85 Data	35
2-3. VOC Emissions in Nonattainment Cities, by Source Category, in 1985	36
24. VOC Emissions Reductions in 1994 Compared to 1985 Emissions, by Control Method	37
2-5. Summary of Estimated Nationwide Nitrogen Oxides (NOX) Emissions by Source Category, by Year	41
2-6. EIA Projections of Petroleum Supply, Consumption, and Import Requirements to 2010, Base Case.....	42
2-7. Distribution of World Oil Reserves, 1988	44

2-8. Current Contribution to Global Warming	54
2-9. Contribution of the Transportation Sector to CO ₂ Emissions	55
3-1. "Relative Reactivity" (Ozone-Forming Capability) of Emissions From M85-Fueled Vehicles v. Gasoline-Fueled Vehicles	66
3-2. Sensitivity of Relative Reactivities of M85 Emissions to Formaldehyde Emissions Levels	67
3-3. Year 2000 Reductions in Peak 1-Hour Ozone Concentrations From M85 Use	68
3A-1. Comparison of Discounted Cash Flow Rates of Return With Capital Charges Based on a Percentage of Total Fixed Investment Plus Working Capital	89
5-1. Process Diagram for the production of Fuel Ethanol From Grain	111
6-1. Effect of Electricity Source on Greenhouse Impact of Electric Vehicles	130

Tables

<i>Table</i>	<i>Page</i>
1. Pros and Cons of Alternative Fuels	2
2. Two Scenarios for Methanol Costs, \$/Gallon 0.....	16
3. Environmental Impacts of Agriculture	18
1-1. Major Users of Alternative Fuels	24
2-1. Options for Amending the Clean Air Act: Currently Available Control Methods	38
2-2. Options for Amending the Clean Air Act: New Directions	39
3-1. Organic Emissions Levels for Gasoline and Methanol-Fueled Vehicles	64
3-2. Component and Total Methanol Supply Costs During a Transition Phase	75
3-3. Component and Total Methanol Supply Costs in unestablished Market Environment ..., ..	76
3-4. Market Shares of Oil and Gas Production and Reserves by Region in 1985	81
3-5. Proved Gas Reserves and Exportable Surpluses	82
3A-1. Estimated 1987 Gas Costs and prices	86
5-1. Environmental Impacts of Agriculture	111
5-2. Potential Environmental Effects of Logging and Forestry	114

Related OTA Reports

- . **Catching Our Breath: Next Steps for Reducing Urban Ozone.** Focuses on the health-based air quality standards for ozone; addresses the problem of regional oxidants; evaluates the cost-effectiveness of controlling various sources of hydrocarbon emissions for lowering ozone levels. O-412, 7/89; 252 p.

GPO stock #052-003-01158-1; \$10.00

NTIS order #PB 90-130 451/AS

- . **U.S. Oil Production: The Effect of Low Oil Prices--Special Report.** Examines issues that influence the future direction of U.S. oil production. These issues include: the expected profitability of new investments in drilling; the potential of new oil exploration, development, and production technologies; the nature of the remaining oil resource base; and structural changes in the oil industry. E-348, 9/87; 144 p.

NTIS order #PB 88-142484

- . **U.S. Natural Gas Availability: Gas Supply Through the Year 2000.** Analyzes the key technical and physical parameters that determine the resource base, production rates, and costs of all categories of below-ground natural gas; critically reviews current estimates of the resource base, estimates the potential production rates of natural gas, and the uncertainties in these estimates; and assesses future technology trends and R&D needs that may accelerate these trends. E-245, 2/85; 260 p.

NTIS order #PB 86-109 162/AS

- . **U.S. Vulnerability to an Oil Import Curtailment: The Oil Replacement Capability.** Provides an analysis of the technical potential for replacing large quantities of oil in the United States over a 5-year period by fuel substitution and conservation in the event of an extended oil supply shortfall and price rise; analyzes the macro-economic consequences of the shortfall and various rates of oil replacement by the technologies. E-243, 9/84; 160 p.

NTIS order #PB 85-127 785/AS
