<i>Chapter</i>		<i>Page</i>
	FOREWORD . . . . .	v
	INTRODUCTION . . . . .	ix
	SUMMARY . . . . .	xi
1.	RAILROAD SAFETY FINDINGS . . . . .	3
	Industry Overview . . . . .	3
	Accident and Cost Data... . . . .	4
	Safety Laws and Regulations. . . . .	9
	Inspection Activities . . . . .	11
	Research and Development . . . . .	13
	Hazardous Materials. . . . .	14
	Rail-Highway Grade-Crossings. . . . .	14
	Other Rail-Safety Programs . . . . .	16
	Safety Concepts . . . . .	17
II.	ISSUES. . . . .	21
III.	THE CONCEPT OF SAFETY . . . . .	33
	Society's Responses to the Safety Problems . . . . .	33
	On What Basis Does Society Make Judgments About the Acceptable Levels of Safety? . . . . .	36
	Who Influences or Makes the Determinations as to Acceptable Levels of Risk?. . . . .	37
	What Conclusions Can Be Drawn About the Concept of Rail Safety? . . . .	38
IV.	HISTORICAL INDUSTRY AND SAFETY OVERVIEW . . . . .	41
	Early Phase of Railroad Safety Activity. . . . .	41
	Recent Railroad Safety Activity. . . . .	45
V.	RAILROAD SAFETY PICTURE . . . . .	53
	Safety of People . . . . .	53
	Employee Accident Analysis . . . . .	55
	Train Service and Nontrain Accidents. . . . .	57
	Safety of Property. . . . .	61
VI.	COST ANALYSIS. . . . .	79
	Railroad Industry Accident Costs . . . . .	79
	Summary of Accident Cost Data . . . . .	79
	Accident Cost Trends . . . . .	81
	Railroad Industry Preventive Costs. . . . .	84
VII.	SAFETY LAWS AND REGULATIONS . . . . .	87
	Purpose of Chapter . . . . .	87
	Structure of Federal Railroad Safety Laws . . . . .	87

# CONTENTS—continued

<i>Chapter</i>	<i>Page</i>
Placement of Authority . . . . .	88
Types of Authority Conferred . . . . .	91
Structure of Federal Railroad Safety Regulations . . . . .	98
<b>VIII. RAILROAD SAFETY INSPECTION PROGRAMS . . . . .</b>	<b>107</b>
Introduction . . . . .	107
Federal Inspection Programs . . . . .	109
State Participation Program . . . . .	120
Railroad Inspection Programs . . . . .	122
Motive and Power Equipment . . . . .	123
Analysis of Railroad Inspection . . . . .	125
<b>IX. RESEARCH AND DEVELOPMENT. . . . .</b>	<b>131</b>
Cooperative Programs . . . . .	133
Railroad Grade-Crossing Research . . . . .	135
TankCarResearch . . . . .	135
R&DExpenditures. . . . .	136
<b>X. HAZARDOUS MATERIALS, RAIL-HIGHWAY GRADE-CROSSINGS, OTHER RAILROAD SAFETY PROGRAMS . . . . .</b>	<b>141</b>
Hazardous Materials. . . . .	141
Responses to the Problems Associated With the Shipmentof Hazardous Materials . . . . .	144
Rail-Highway Grade-Crossings . . . . .	148
Analysis of Specific Grade-Crossing Safety Activities. . . . .	154
Other Railroad Safety Programs . . . . .	157
<b>APPENDIXES</b>	
Appendix A—Persons Interviewed . . . . .	165
Appendix B—Accident Reporting Information . . . . .	171
Appendix C—RailroadAccident Trends . . . . .	181
Appendix D—RailroadSafety Inspection Program . . . . .	189
Appendix E—Responsesto Railroad Safety Questions . . . . .	199

## LIST OF TABLES

<i>Table No.</i>	<i>Page</i>
1. Casualties ResultingFrom Class Iand II RailroadAccidents. . . . .	4
2. TrainAccidentsandAssociated Costs . . . . .	5
3. TrainAccidentsbyContributing Cause . . . . .	5
4. TrainAccidentsbyClass . . . . .	6

# LIST OF TABLES—continued

<i>Table No.</i>	<i>Page</i>
5. Derailments by Contributing Cause . . . . .	7
6. Railroad Accident Costs. . . . .	8
7. Rail-Highway Grade-Crossing Accidents. . . . .	15
8. Railroad Casualty Data: 1902-11 . . . . .	42
9. Early Safety Laws and Amendments . . . . .	44
10. Railroad Fatalities 1923-31 . . . . .	45
11. Chronology of Railroad Safety Legislation and Related Laws. . . . .	45
12. Volume of Intercity Passenger Traffic . . . . .	46
13. Railroad Employment Characteristics . . . . .	47
14. Employment Costs and Railroad Operating Revenues (in millions) . . . . .	47
15. Intercity Freight Transportation Characteristics. . . . .	48
16. Railroad Rate of Return . . . . .	48
17. Railroad Technology Utilization . . . . .	49
18. Casualties by Type of Railroad Accident . . . . .	54
19. Casualties Resulting From Class I and Class II Railroad Accidents . . . . .	54
20. Train Service Accidents . . . . .	57
21. Nontrain Accidents . . . . .	59
22. Train Accidents and Associated Costs . . . . .	62
23. Train Accidents . . . . .	65
24. Train Accidents by Contributed Cause. . . . .	66
25. Train Accidents by Class . . . . .	74
26. Derailments by Contributing Cause. . . . .	75
27. Costs to the Railroad Industry From Railroad Accidents, 1966-75 . . . . .	82
28. Railroad Accident Cost . . . . .	83
29. Percentage of Total Railroad Accident Costs . . . . .	83
30. Enforcement Powers . . . . .	95
31. Track Safety Inspection Benchmarks . . . . .	114
32. Operating Practices Safety Inspection Program Benchmarks . . . . .	116
33. Motive Power and Equipment Safety Benchmarks . . . . .	118
34. Signal and Train Control Safety Inspection Program Benchmarks . . . . .	118
35. Hazardous Materials Safety Program Benchmarks. . . . .	120
36. FRA Research and Development Obligations. . . . .	136
37. Total FRA Research and Development Office Expenditures for Safety-Related Research, 1973-76 . . . . .	136
38. AAR Research and Test Budgets, 1974-77 . . . . .	137
39. FRA Office of Research and Development Approximation of Safety-Related Expenditures, 1973-76 . . . . .	137
40. Actions Required To Ensure Safe Rail Shipment of Hazardous Materials . . . . .	145
41. Number of Carriers Reporting to MTB. . . . .	146
42. Number of Reports Submitted to MTB. . . . .	146
43. Accidents Involving Hazardous Materials, Spills, or Explosions, All Accidents . . . . .	147
44. Grade-Crossing Safety Programs . . . . .	149
45. Fatalities for All Grade-Crossings . . . . .	150
46. Federal Government Grade-Crossing Programs. . . . .	151
47. Summary of Program Costs and Results. . . . .	155
48. Title 23 Costs. . . . .	155
49. Railroad Safety Programs . . . . .	157

# List of Figures

<i>figure</i>	<i>Page</i>
<i>No.</i>	
1. Train Service Employee Injuries Normalized by Million Man-Hours of Employment, 1966-74 . . . . .	58
2. Nontrain Employee Injuries Normalized by Million Man-Hours of Employment, 1966-74 . . . . .	60
3. Number of Train Accidents at Thresholds of \$750, Inflated, 1966-74 . . . . .	63
4. Percentage of Human Factors, Equipment, Track, and Miscellaneous Train Accidents, Inflated Thresholds, 1966-74 . . . . .	66
5. How Increase in Use of Detection Systems and Incidence of Roller-Type Bearings Has Dropped Journals Below Car Dynamics Group (Bolsters, Side-Bearings, Sills, etc. ) as Major Source of Derailments. . . . .	68
6. Percent of Mainline, Branchlike, and Yard Track Accidents at Various Thresholds, 1973 Data. . . . .	69
7. Track Accidents Normalized by Million Gross Ton-Miles: Total, Bankrupt and Nonbankrupt Roads, 1966 -74. . . . .	71
