L Executive Summary	1
The Approach	1
Summary	1
Policy Options..	7 “ “
11. Introduction.	11
M. Floods: A National Policy Concern	13
The Physical Bases of Floods	13
The Geographic Scope of Floods	14
The Costs of Floods	1 4
Elements of National Response	23
IV. A Framework for Flood Hazards Management	27
The Lifecycle of a Flood Hazard Warning	27
Warning	30
The Time Frame of Public Policy Planning and Implementation	30
Tools Available for Flood Hazards Management	31
Beyond Calculating Costs and Benefits	34
V. Trends and Images of the Future.	39
Trends Directly Related to Floods	39
Trends Related to Natural Hazards	41
VI. The Issues	43
Public Policy Issues	43
The Issues in Flood Hazards Management	43
VII. The National Flood Insurance Program.	47
Origins of the Program	47
The Present Program	48
What NFIP Has Accomplished	52
Some Recent Studies of Flood Insurance	53
VIII. Flood Insurance Issues.	57
Reorganization—Transfer to FEMA	57
Intergovernmental Relations.	57
The Emergency Program.	60
Coastal Hazards and Erosion	62
Postdisaster Recovery and Mitigation	62
Government as Salesman and Agent for Technology Transfer	63
IX. Legal Aspects of Floodplain Regulation in the 1970's.	65
Introduction	65
The Judicial Recognition of Flood Hazards.	66
Inland and Coastal Wetlands Restrictions: Indirect Floodplain Management.	69
X. The Roles of Federal, State, and Local Governments	73
Federal Roles	73
The Role of the States.	76
The Role of the Local Government	76

Contents—continued

chapter	Page
XI. Knowledge Gaps and Research Needs	79
Why Research?	79
What Is Currently Known With Respect to Flood Hazards Management? . . .	79
Knowledge Gaps in Flood Hazards Management	80
Policy Research Priorities	81
XII. Some Policy Options	89
Setting Goals.	89
Land Use Management.	89
A Federal Opportunity: Leadership by Example.	89
The Flood Insurance Program as Hazards Manager.	90
An All-Hazards Approach to Insurance	90
The Mission of the Corps of Engineers,	91
Mapping Delays and Alternative Entry Policies	91
Appendixes	
A. Coastal Erosion	93
B. Executive Order 11988	95
LIST OF TABLES	
1. Policy Research and Study Needs in Relation to Congressional Functions	8
2. Frequency and Cause of Flooding Between 1886 and 1972 in the New York State Counties of Livingston, Steuben, and Chemung	17
3. Exposure to Floods of Selected Urbanized Areas	18
4. Losses in Individual Severe Floods in the United States Since July 1902	20
5. Annual Property Loss Attributable to Floods.	21
6. Flood History of Rapid City, S. Dak.	2
7. Chronology of Major Flood and Public Response	23
8. Governmental Strategies and Tools for Flood Hazards Management.	32
9. Relevance of Nonstructural Measures to Floodplain Management Objectives	32
10. Means or Policy Options in the Implementation of Nonstructural Measures	33
11. Identification of Costs by Sector	36
12. Identification of Benefits by Sector	36
13. Trends in Relation to Natural Hazards in the United States	42
14. Seven Issues in Flood Hazards Management Summarized.	44
15. Growth of Coverage Under the National Flood Insurance Program	50
16. Community Progression in the National Flood Insurance Program	51
17. Individual Perception of Flood Damage.	54
18. Flood Insurance: Residents and Businesses Through 1977	55
19. Patterns of Flood insurance Purchase in 43 Pennsylvania Communities.	56
20. Federal Elements in Floodplain Management.	75
21. Funding Levels for Research Opportunity Sets.	82
22. Research Opportunities-Hurricanes	83
23. An International Comparison of Flood Hazards: Canada.	85
A-1. Research Opportunities-Coastal Erosion.	93
LIST OF FIGURES	
1. Lifecycle of a Flood Hazard.	3
2. Most Flood-Prone Areas of the United States	15
3. Map of Southern New York State Indicating the Flood-Prone Counties of Livingston, Steuben, and Chemung	16
4. Losses in United States Floods, 1905-72	19
5. Lifecycle of a Flood Hazard.	28
6. The Complexity and Confusion of Federal Responsibilities.	29
7. National Flood Insurance Program's History	49
