The Management of Health Care Technology in Ten Countries

October 1980

NTIS order #PB81-144628
Foreword

This report was developed as part of OTA'S study on the use of cost-effectiveness analysis to evaluate medical technologies. Recognizing a common international concern about the costs and benefits of medical technologies, OTA commissioned papers describing the health care systems of nine countries and the mechanisms these countries use for managing the diffusion and use of medical technologies. Whenever possible, the authors included data on five specific medical technologies: the computed tomography scanner, renal dialysis, coronary bypass surgery, cobalt therapy, and automated clinical laboratory services. Equivalent information for the United States is presented and compared to that for the nine other countries in the summary and analysis (ch. 11), which was prepared by OTA staff and Louise Russell, Ph. D., of The Brookings Institution.

Initial drafts of the nine papers on the management of medical technologies in other countries were reviewed by Dr. Russell and OTA staff. Helpful comments were also provided by Henry Aaron, Ph. D., of The Brookings Institution. On November 1, 1979, most of the authors met for a 1-day workshop in Washington, D. C., to discuss their papers and the implications of their findings. In the following weeks, they completed their revisions. Helpful comments on the Japan paper were given to OTA by Dr. John Bowers of the Macy Foundation and Professor Daizo Ushiba of the International Medical Information Center, Tokyo. Dr. Irv Asher of the Food and Drug Administration furnished specific information on drug and device regulation in several countries, and Dr. Peter Frommer of the National Heart, Lung, and Blood Institute provided helpful comments on coronary bypass surgery. A draft of the entire volume was reviewed by two OTA advisory bodies: the Health Program Advisory Committee and the Advisory Panel on the Implications of Cost-Effectiveness Analysis of Medical Technology. OTA is grateful for the many contributions of all these individuals.

As a background study, this volume does not include policy options. It should be noted that since international literature in the area of evaluating and managing medical technologies is sparse, firm conclusions are difficult to reach—only a few conclusions are stated in chapter 11. The many different approaches to medical technology in other countries do offer a fruitful testing ground for new ideas, however, and OTA hopes that this report will stimulate further activity, including comparative research.

John H. Gibbons
Director
Advisory Panel on The Implications of Cost-Effectiveness Analysis of Medical Technology

John R. Hogness, Panel Chairman
President, Association of Academic Health Centers

Stuart H. Altman
Dean
Florence Heller School
Brandeis University

James L. Bennington
Chairman
Department of Anatomic Pathology and Clinical Laboratories
Children Hospital of San Francisco

John D. Chase
Associate Dean for Clinical Affairs
University of Washington School of Medicine

Joseph Fletcher
Visiting Scholar
Medical Ethics
School of Medicine
University of Virginia

Clark C. Havighurst
Professor of Law
School of Law
Duke University

Sheldon Leonard
Manager
Regulatory Affairs
General Electric Co.

Barbara J. McNeil
Department of Radiology
Peter Bent Brigham Hospital

Robert H. Moser
Executive Vice President
American College of Physicians

Frederick Mosteller
Chairman
Department of Biostatistics
Harvard University

Robert M. Sigmond
Advisor on Hospital Affairs
Blue Cross and Blue Shield Associations

Jane Sisk Willems
VA Scholar
Veterans Administration
OTA Staff for Background Paper #4

Joyce C. Lashof, Assistant Director, OTA
Health and Life Sciences Division

H. David Banta, Health Program Manager

Clyde J. Behney, Project Director
The Implications of Cost-Effectiveness
Analysis of Medical Technology

H. David Banta, Study Director, Background Paper #4
Kerry Britten Kemp, Editor
Shirley Ann Gayheart, Secretary
Nancy L. Kenney, Secretary

OTA Publishing Staff

John C. Holmes, Publishing Officer
Kathie S. Boss        Debra M. Datcher        Joanne Mattingly
HEALTH PROGRAM ADVISORY COMMITTEE

Frederick C. Robbins, Chairman
Dean, School of Medicine, Case Western Reserve University

Stuart H. Altman
Dean
Florence Heller School
Brandeis University

Robert M. Ball
Senior Scholar
Institute of Medicine
National Academy of Sciences

Lewis H. Butler
Health Policy Program
University of California, San Francisco

Kurt Deuschle
Professor of Community Medicine
Mount Sinai School of Medicine

Zita Fearon
Consumer Commission on the Accreditation of Health Services, Inc.

Rashi Fein
Professor of the Economics of Medicine
Center for Community Health and Medical Care
Harvard Medical School

Melvin A. Glasser
Director
Social Security Department
United Auto Workers

Patricia King
Professor
Georgetown Law Center

Sidney S. Lee
Associate Dean
Community Medicine
McGill University

Mark Lepper
Vice President for Inter-institutional Affairs
Rush-Presbyterian Medical School
St. Luke’s Medical Center

Frederick Mosteller
Professor and Chairman
Department of Biostatistics
Harvard University

Beverlee Myers
Director
Department of Health Services
State of California

Mitchell Rabkin
General Director
Beth Israel Hospital

Kerr L. White
