Contents

Chapter  Page

1. Summary ..................................................  3
2. “New Chemicals” and the Toxic Substances Control Act .................................  11
Regulation of New Chemicals ..................................  11
Actions Available to EPA Following PMN Reviews ........................................  12
Public Notice of New Chemicals Considered for Manufacture ............................  14
PMN Reporting Requirements ................................  14
EPA Management of PMN Review ................................  15
Proposed Exemptions to the PMN Reporting Requirements ................................  16
Risk Assessment .................................................  19
Structural Activity Relationship Analysis and Its Use in PMN Review ...................  20
PMNs Examined by OTA .........................................  25
Inspection of PMN Files ..........................................  26
Information Collected From PMNs ................................  27
Security Precautions To Protect Confidential Business Information ....................  29
EPA Cooperation ................................................  29
Analysis of the Data .............................................  30
Organization of the Presentation of the Analysis .............................................  30
4. Frequency of Submission of TSCA-Specified Data on Premanufacture Notices ....  33
Numbers of PMNs Submitted to EPA ................................  33
Chemical Name and Production Volumes ..................................................  34
Chemical Formulae and Structures ...............................................  35
Byproducts ................................................................  36
Uses .....................................................................  37
Number of Workers Exposed and Disposal ....................................................  37
Summary of Findings About Reporting of TSCA-Specified Information .................  38
5. Frequency of Submission of Physical-Chemical Information on Premanufacture Notices ....  41
How Many Physical-Chemical Data Were Submitted on PMNs? .........................  41
Physical-Chemical Data Were Reported More Frequently unmanufactured PMNs ....  43
Submission of Physical-Chemical Data on PMNs of Different Classes .................  44
Summary of Findings About Submission of Physical-Chemical Data ......................  45
6. Frequency of Submission of Toxicity Information on Premanufacture Notices ....  49
How Many Toxicologic Data Were Submitted on Pans? ....................................  50
Toxicity Data Were Reported More Frequently on Manufactured PMNs ..............  52
 Submission of Toxicity Data on PMNs Describing Different Classes of Chemicals ....  53
7. Submission of Physical-Chemical and Toxicity Information on Some Subgroups of Premanufacture Notices ..........................  57
PMNs Submitted for Consumer Products ..................................................  57
PMNs Submitted for Polymers ...........................................  58
PMNs Submitted for Site-Limited Chemicals ...............................................  59
PMNs Submitted for Low-Production-Volume Chemicals .................................  60
Comparison of Toxicity Data Submitted on Consumer and Nonconsumer Substances, Both Polymers and Nonpolymers, Scheduled for Production indifferent Amounts ..................  62
Magnitude of Scale-Up in Production of Low-Volume Chemicals .......................  64
Are PMNs Submitted for Imported Chemicals More Complete Than Those Submitted for Other Chemicals? ..........................  66
8. Actions Taken by the Environmental Protection Agency as a Result of Reviewing Premanufacture Notices .............................  69
9. Discussion ......................................................  75
Frequency of Reporting of Information on Premanufacture Notices ....................  75
Data Submitted on PMNs That Described Chemicals Intended for Consumer Use ....  75
Data Submitted on PMNs That Described Chemicals Proposed for Exemption From PMN Review ........................................  76
Usefulness of Submitted Information for EPA’s Risk Assessment Process .............  77
Possible Further Evaluation of the PMN Review Process ................................  78
Appendix A: Summary of Topics Considered at Evaluation Meeting During Initial Screen of Premanufacture Notices at the Environmental Protection Agency ..........................  83
Appendix B: Copies of Face Sheets: EPA and CMA PMN Forms ......................  84
Appendix C: Acknowledgments ..........................................  86
Appendix D: Acronyms and Glossary ......................................  88
References .........................................................  90

Tables

Table No.  Page

1. Proposed Low-Volume and Site-Limited Intermediate Exemption Provisions ....  17
2. Proposed Polymer Exemption Provisions ...........................................  17
3. Completeness of PMNs for TSCA-Specified Information ............................  35
