Having trouble connecting to the VGA cables to use the projectors in classrooms??

If you have a white iBook you need this

This is a
“mini DVI to VGA adapter”

If you use a silver Powerbook you need this

This is a
“DVI to VGA adapter”

These are “DVI to VGA” adapters- you can buy them online though I believe your computer came with the one you need.

Note- OIT and other computer professionals sometimes refer to these adapters as “dongles.”
