CEBIC Undergraduate Summer Research Fellowship Program

The Center for Environmental BioInorganic Chemistry (CEBIC) of the Princeton University Environmental Institute announces a competitive summer undergraduate research fellowship program for students, typically in their sophomore and junior years, to pursue research at any of the participating laboratories:

Bates College, Maine
McGill University, Montreal, Quebec, Canada
Montclair State University, New Jersey
Princeton University, New Jersey
Rutgers University, New Jersey
University of California at Santa Barbara or Santa Cruz, California
University of British Columbia, Vancouver, British Columbia, Canada
and Woods Hole Oceanographic Institute, Massachusetts.

Students concentrating in chemistry, molecular biology, geosciences, ecology and evolutionary biology, and civil and chemical engineering, as well as in other environmental sciences are encouraged to apply.

**Interested students must consult the CEBIC web page** (www.princeton.edu/~cebic/) **to get acquainted with areas of research and contact a CEBIC investigator to discuss your research proposal.**

The eight-week summer fellowship will provide a $3000 stipend and travel support.

**Applications:**

Submit a one-page proposal identifying the professor with whom you have consulted and would like to work, what you could contribute to the research and what you plan to learn from the experience.

Send the proposal with **your name, mailing and email addresses, telephone number, school, class year, department, and the names and telephone numbers of two references to:**

Anne Catena
Princeton Environmental Institute
132 Guyot Hall
Princeton University
Princeton, NJ 08544
e-mail: acatena@princeton.edu

**Deadline: March 1, 2004.**

Support is provided by the National Science Foundation and the universities listed above.
