

# Contents

## Summary i

Introduction 1

- Varying Perspectives on the Nature of the Problem and on Potential Solutions 3

A Snapshot of the U.S. Transportation System and Its Energy Use

- Passenger Travel 5

- Freight Movement 7

Transportation Energy Use and Potential for Conservation 7

U.S. Transportation Energy Consumption: Where Is It Heading? 8

Is the U.S. Transportation System Energy-Efficient? A Comparison With Europe 10

Why Intervene in the Transportation System? 12

- Economic Efficiency, Externalities, and Unpriced Inputs 12

- Congestion 13

Options for Reducing Transportation Energy Use 14

- Gasoline Taxes 14

- Full Cost Accounting 15

- Automobile and Light-Truck Fuel Economy Standards 16

- “Feebates”: An Alternative or Complement to Fuel Economy Standards 19

- Transportation Demand Management Measures 20

- Public Transportation 21

- Urban Planning 22

- High-Speed Intercity Public Transportation 23

- Improving Auto Fuel Economy: Moving Beyond Current Technology 24

- Shifting to Alternative Fuels 26

Freight Policy 28

Policy Overview 29

## **1 Introduction 31**

## **2 Where We Are, Where We're Going 35**

A Snapshot of the U. S. Transportation System 35

- Passenger Travel 37

- Freight Transport 43

Trends in U.S. Transportation 46

- Passenger Travel 47

- Freight 50

Forecasting Transportation Energy Consumption 53

- General Considerations—Factors That Will Affect Transportation Energy Consumption 53

- Alternative Forecasts 65

## **3 Is the U.S. System Energy-Efficient? A Comparison With Europe 77**

U.S. Potential To Move Toward European Transport Energy Levels 77

Passenger Transport Energy in the U.S. and Europe Today 78

Trends in U.S. and European Passenger Transport Energy 84

U. S. and European Freight Transport Energy Use 86

Conclusions 87

## **4 Why Intervene? Externalities, Unpriced Inputs, Problems Needing Solutions 91**

Why Governments Might Want To Actively Promote Energy Conservation in Transportation 91

- Correction for an Existing Network of Subsidies and Inefficient Pricing 92

- Externalities 92

Auto Benefits 94

- Attitudes Toward Automobiles 95

- “\*Internal” or Private Benefits 96

- Benefits to Society 96

Inefficient Pricing: Subsidies, Externalities, Hidden Costs 98

- Introduction and Viewpoint 98

- Detailed Results 103

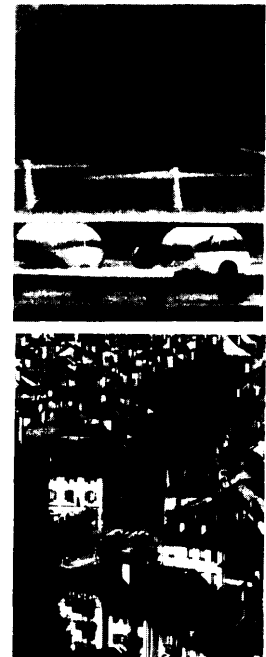

- Conclusions 109

Congestion 111

- Proposition: There Is a Major National Congestion Problem 111

- Counterarguments 114

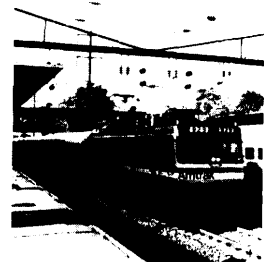

- Evaluation 115

- Energy Security and Transportation 122
  - Extent of the Security Threat 123
  - Impact of Conservation on Security 125
  - Energy Security Costs 126
- Ozone Pollution and Transportation 128
  - Why Control Ozone? 128
  - Ozone and Its Precursors 129
  - Controlling Volatile Organic Compounds 130
- Other Externalities 132
  - Other Air Pollutants 132
  - Land Use Impacts 133
  - Accidents 133
  - Noise and Vibration 134
  - Ecosystem Losses 134

## 5 Policy Options for Transportation Energy Conservation 135

- What If the Federal Government Initiates No New Policy Measures? 139
- New Fuel Economy Standards 140
  - Are Fuel Economy Standards an Efficient and Effective Approach to Fuel Conservation? 141
  - What Is the Fuel Economy Potential of the U.S. New Car Fleet? 143
  - Which Type of Standard Is Best? 148
  - What Is the Best Schedule for New Standards? 149
  - New Fuel Economy Standards and Safety 150
  - Employment Impacts 153
  - Fuel Savings From an Aggressive Fuel Economy Standard (S. 279) 156
  - Regulation of Light-Truck Fuel Economy 157
  - Conclusions 159
- Feebate Programs: An Alternative or Complement to CAFE Standards 159
- Moving to the Superefficient Automobile 162
  - Designs Based on the Internal Combustion Engine 163
  - Electric Vehicles 165
  - Which Technology Will Win? 169
- Alternative Fuels and Conservation 169
  - Background 169
  - Emissions and Air Quality Impacts 173
  - Energy Security Impacts 175
  - Sources of Uncertainty About the Greenhouse and Energy Use Impact of Alternative Fuels 176
  - Recent Estimates of Greenhouse Impacts of Alternative Fuel Cycles 177

•Policy Issues	178
Public Transportation	180
▪Views of Transit Proponents and Critics	180
▪Transit Performance in the United States	183
▪Evaluating Costs and Benefits	188
•Magnification of Transit Benefits	190
▪What Is Possible?	192
▪Conclusions	197
Urban Form and Transportation	199
•Evidence for a Strong Relationship Between Urban Form and Transportation Energy Use	200
▪Reliability of the Data	205
•Cause and Effect	205
▪Can We Hope To Change Land Use?	206
•Conclusions	211
Intercity Travel and High-Speed Ground Transportation Systems	212
Social Cost Pricing Policy	216
•Key Issues	216
Gasoline Taxes	224
•Impacts on Economic Variables	224
•Using Gasoline Taxes To Address Externalities	227
▪Model-Based Results	230
Transportation Demand Management	230
•Economic Incentives	232
▪Regulatory Mandates	236
•Telecommuting	239
▪Public Investments, Information, and Other Efforts To Manage Transportation Demand	242
▪Conclusions	246
Reducing Freight Energy Use	247
•Policy Context	247
▪What Is the Potential?	248
•Policy Options	250
