## 142 | Nuclear Safeguards and the International Atomic Energy Agency

- “ad hoc” inspections, 37-38, 80
  - challenge inspections, 60,61-62
  - characteristics of, 81
  - experience of inspectors, importance of, 121
  - INFCIRC/153 provisions, 57-58,60
  - legal limits on, 57-58
  - limited frequency unannounced access, 72
  - long-duration visas for inspectors, 17,86-87
  - managed access and, 16,61-62
  - maximum routine inspection efforts, 57-58
  - overinterpretation of openness to inspection visits, 10, 62
  - reallocation of inspection effort, 7-9,55-57,58-59
  - right of inspectors to go anywhere unimpeded, 41
  - routine, 80
  - South African openness to, 16,31,95
  - states’ yielding of sovereignty for, 4,33,49
  - types of, 80-81
  - voluntary openness and, 10, 16, 60,62,95
  - Inspector training, 41
  - International Atomic Energy Agency. *See also*
    - IAEA safeguards
    - Board of Governors membership, 88, 130-134
    - budget, 5,49-51,52,54-55
    - commitment to maintaining political support within, 42
    - compliance issues, 3, 38-39, 89
    - conservatism of, 17, 40-41
    - design information proposal, 42
    - discrimination against member states, 56,58,70, 75, 110
    - establishment, 1, 26
    - goal attainment percentage, 49,70
    - increased transparency within, 17, 85-86
    - inspection authority, 4-5, 27
    - inspector training, 41
    - lack of enforcement means, 33
    - membership, 28, 130-134
    - outside information about undeclared facilities, 14-15,41,42,78-79
    - promotional activities, 53-54,87-88
    - proposed by Eisenhower, 26
    - regional arms control agreements, 10-11,62,65
    - resources available for safeguards, 7-8,50-53, 54-55

 Schumer amendment to the Energy Policy Act, 107-108  
 Significant quantities, 29  
   definition, 11,38,66,68  
   lowering of thresholds, 66-68  
   Programme 93 + 2 and, 44  
 SIRS. See *Safeguards Implementation Reports*  
 Slovak Republic  
   possible reduced inspections for in return for increased transparency, 64  
 South Africa  
   accession to the NPT, 35  
   “ad hoc” inspections, 37  
   completeness of declared inventory, 2,78-79  
   fill-scope safeguards, 16,50-51,83  
   Helikon uranium enrichment process, 71  
   intelligence information about, 78  
   nonroutine inspections, 84-85  
   openness to inspection, 16,31,95  
   Pelindaba uranium enrichment plant, 71  
   provision of increased access to the IAEA, 64  
   request for visits rather than formal inspections, 9,59  
 South Carolina  
   Savannah River facility, 108

South Korea  
   IAEA technical assistance to, 53,54  
   provision of increased access to the IAEA on a trial basis, 45  
   regional arms control agreement with North Korea, 62, 65  
   suspensions concerning nuclear weapon program, 64  
 Sovereignty  
   states’ voluntary yielding of, 4, 33, 41,49  
 Soviet Union. See Former Soviet Union  
 Special inspections, 15-16,42,49,59  
   “anytime, anywhere,” 79-80, 82  
   description, 80-81  
   increase in frequency of, 79-80, 82  
   new instrument requirement, 82  
 Spectrophotometry, 128  
 SQs. See Significant quantities  
 SSACs. See State systems of accounting and control  
 State systems of accounting and control, 27,29,44, 50  
 Strengthening traditional safeguards, 7-17,37  
 Surprise inspections  
   description, 81  
 Sweden  
   C/S test operation, 77  
   possible reduced inspections for in return for increased transparency, 64  
   provision of increased access to the IAEA on a trial basis, 45  
   suspensions concerning nuclear weapon program, 64  
 Switzerland  
   possible reduced inspections for in return for increased transparency, 64  
   suspensions concerning nuclear weapon program, 64

## T

Taiwan  
   suspensions concerning nuclear weapon program, 64  
 Take-back policy on HEU, 108-110  
 Target values, 119, 122, 126  
 Technical Cooperation and Assistance Fund, 52, 53-54  
 Technical visits, 10, 15-16,80,81  
 Tennessee  
   Oak Ridge facility, 65, 109  
   Tennessee Valley Authority, 25  
 Termination of nuclear weapon program. See *also*  
   Initial inventory  
   verification of, 83

- Thailand
  - IAEA technical assistance to, 53
- THORP reprocessing plant, 13-14, 119, 121, 123, 126
- Threshold states, 99-102
- Timeliness, 11-12, 29, 30
  - basis for, 68
  - goals for, 68-69
  - lowering of thresholds, 68-70
- Traditional safeguards
  - bulk-handling facility uncertainties, 70, 73-78
  - confidence in, 38, 39-45
  - difficulties and limitations, 49-50, 94
  - enhanced transparency, 9-11, 59-60, 62-66, 85-86
  - exemptions from, 67
  - importance of ensuring the absence of undeclared facilities, 9-10, 40
  - lowering SQ or timeliness thresholds, 11-12, 29, 30, 66-70
  - objectives, 45, 49
  - procedural and institutional improvements, 83-88
  - reallocation of inspection effort, 7-9, 55-57, 58-59
  - resources available, 7-8, 50-53, 54-55
  - states with nuclear infrastructures and, 82-83
  - strengthening, 7-17, 37
  - technical capability improvement, 66-71, 73-78
  - undeclared facility detection improvement, 78-80, 82
- Transparency measures
  - increased transparency within IAEA, 17, 85-86
  - options for enhanced transparency, 9-11, 59-60, 62-66
  - tradeoff between increased transparency and reduced inspection frequency, 63
