

# Contents

## 1 Overview 1

Renewable Energy Resources and Technologies 2  
Policy Options 15  
Conclusion 23

## Appendix I-A: National Energy Use and Renewable Energy 27

## 2 Agricultural Energy Crops 33

Bioenergy Supplies 36  
Potential Environmental Impacts 40  
Economic Impacts 45  
RD&D and Commercialization 49  
Policy Options 60  
Crosscutting Issues 64  
Conclusion 65

## 3 Residential and Commercial Buildings 67

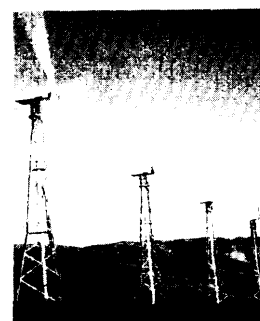

Introduction 69  
Renewable Energy Technologies 71  
Policy Options 98  
Crosscutting Issues 101  
Conclusion 101

## 4 Transport 103

What Has Changed in Transport Fuels? 103  
Renewable Energy Paths for Transport 108  
A Renewable Fuel Menu 111  
Emerging Vehicle Technologies 124  
Policy Issues 139  
Conclusion 144

## 5 Electricity: Technology Development 145

Renewable Energy Technologies and Industries 146  
Renewable Energy Systems 180  
Overcoming Barriers 188

Policy Options 194  
Crosscutting Issues 197  
Conclusion 197

## **6 Electricity: Market Challenges 199**

Electricity Sector Change 19  
Power Plant Finance 204  
Utility Full Fuel-Cycle Tax Factors 214  
Direct and Indirect Subsidies 217  
Risk and Uncertainty 217  
Environmental Costs and Benefits 222  
Approaches to Commercializing RETS 224  
Conclusion 228

## **7 Government Supports and International Competition 229**

International Activities in PV and  
Wind Technologies 232  
Japan 238  
European Union 241  
Denmark 243  
France 245  
Germany 247  
Italy 249  
Netherlands 250  
Switzerland 252  
United Kingdom 253  
Comparisons 255  
Policy Options 257  
Conclusions 258

## **APPENDIX**

### **A Units, Scales, and Conversion Factors 259**

### **Index 261**
