

C o n t e n t s

1	Conclusions.	1
2	Introduction.	9
	The Ecological Underpinnings of Development Assistance.	10
	The Agencies' Response.	13
3	Why Ecologically Inappropriate Technologies May be Selected.	16
	Introduction.	16
	Where Sustainable Technologies May Not Exist.	17
	Where Unsustainable Technologies Are Chosen.	18
	Where Sustainability is Not Determined.	20
4	Conditions Internal to Development Assistance Organizations That Perpetuate Inappropriate Technology choice.	22
	Introduction.	22
	Conflicting Goals.	23
	Narrow Evaluations and Poor Feedback.	26
	Inappropriate Staffing.	30
	Structural and Procedural Constraints.	31
5	How to Change- -Piecemeal Approaches.	41
	Introduction.	41
	Relieve the Overriding Prssure to Move the Money.	41
	Improve Project Planning and Ensure Project Flexibility.	42
	Increase Personnel Motivation and Accountability.	45
	Hire Enough of the Right People.	47
	Improve Use of In-house Expertise.	48
	Improve Selection of Consultants.	50
6	How to Change--Holistic Approaches.	52
	Introduction.	52
	Make Technology/Ecology Fit an Expressed Priority.	52
	Encourage Research and Cautious Innovation.	54
	Restructure Technical Resources.	55
	Strengthen Technology Selection Expertise.	59
