Summary	1
Overview and Findings	1
Introduction	4
How and Why would U.S. Oil Production Decline?	5
An Approach To Understanding Oil Production	9
Economic and Resource Factors Affecting Production	10
Changes in the Oil Industry Affecting Production	14
Resisting a Decline in U.S. Oil Production: Should Government Play an Active Role?.	19
Chapter 1: introduction	25
The Origins of Today's Low Oil Prices.	25
Effects on the Oil Industry	25
Congressional Concerns	27
The OTA Study	28
Chapter 2: Projections of U.S. Crude Oil Production	31
Introduction	31
Projections of U.S. Oil Production Made Prior to the Price Break	31
Recent Projections of U.S. Oil Production Assuming Continued Low Oil Prices	32
Chapter 3: International Oil Prices: Where Are They Going?	35
History	35
Alternate Projections of Future Oil Prices	36
Determinants of Future Oil Prices	38
Chapter 4: What Will Determine Future Production?	41
Introduction	41
The Reliability of Forecasts of U.S. Oil Production	41
Factors Affecting Future Oil Production	42
Chapter 5: Economic and Resource Factors Affecting U.S. Oil Production.	45
The Profitability of New Investment in Oil Exploration, Development, and Production	45
Capital Availability and the Permanence of Capital Flight	66
Premature Loss of Existing Production: Stripper Wells	71
The Nature of the Resource Base.	75
The Effects of the Natural Gas Surplus.	87
Chapter 6: Changes in the Oil Industry Affecting U.S. Oil Production.	89

	<i>Page</i>
Changes in the Climate for Oil Investments in the United States and Overseas.	89
The Efficiency of E&D Activities	90
Changing Oilfield Technology.	93
Deteriorating Industry Infrastructure and the Potential for a Rebound in Oil Production	95
The Restructuring of the U.S. Oil Industry.	99
Chapter 7: Production Loss From Reduced Drilling	125
The Level of Drilling Activity	125
The Distribution of Drilling Targets, and the Likely Success at Adding Reserves and Production	126
Projecting Oil Reserve Additions and Production Based on Extrapolating Regional Drilling Patterns and Per Well Reserve Additions	127

Boxes

<i>Box</i>	<i>Page</i>
A. Recent Studies by the National Petroleum Council and the Department of Energy	5
B. Potential Problems With the Interstate Oil Compact Commission/The RAM Group, Ltd. Estimate of Stripper Well Production Losses Due to Low Oil Prices	74

Figures

<i>Figure No.</i>	<i>Page</i>
1. Net U.S. Oil Imports as a Percentage of Oil Consumption, as Projected by the National Petroleum Council	1
2. Oil and Gas Drilling Trends	6
3. How Profit Expectations for the Same prospect would Have Changed Over Time: An Oil Exploration Prospect in Texas' Permian Basin	11
4. Regional Differences in Oil Reserves Added Per Well Drilled	17
5. U.S. Crude Oil Production, 1947-86	27
6. Oil and Gas "Finding Costs"	65
7. Size Distribution of Discovered Oil and Gas Fields in the Lower 48 States	79
8. Known and Projected Size Distributions of Discovered Oil and Gas Fields in the Lower 48 States.	80
9. Oil "Finding Rate"	92

Tables

Table No.	Page
1. Recent Projections of Future U.S. Oil Production	7
2. Projections of Future U.S. Oil Production, 1985 Outlook	32
3. Recent Short-Term Projections of U.S. Oil Production at Low Prices	32
4. Recent Projections of Future U.S. Oil Production at Low Prices	34
5. "Why Oil Prices Will Remain Low"-Arguments Used by Forecasters of Low Future Oil Prices	38
6. "Why Oil Prices Will Increase"-Arguments Used by Forecasters of High Future Prices	39
7. Assumed Costs To Drill, Equip, and Operate Development Wells, Selected Years	48
8. Oil Prices for West Texas Crude	49
9. Economic Analysis of Drilling Prospects: Development Wells in Reservoirs Not Producing Before 1979	50
10. Economic Analysis of Drilling Prospects: Development Wells; Effect on Profitability of Windfall Profits Tax "Tiers".	51
11. Economic Analysis of Drilling Prospects: Effects of Oil Price on Rate of Return Tier 3 Development Wells, Drilling and Production Begun in 1986	51
12. Economic Analysis of Drilling Prospects: Effect of Changing Drilling Costs on Rate of Return	51
13. Economic Analysis of Drilling Prospects: Policy Options for Improving the Profitability of Development Drilling	52
14. Economic Analysis of Exploration and Development Projects	53
15. What Happens If Dry Hole Risk Is Reduced?	53
16. Characteristics of Hypothesized Prospects	54
17. Estimated Investment and Operating Costs	55
18. Assumed Crude Oil Prices	55
19. Tax and Financial Variables	56
20. Estimated Anticipated Profitability of U.S. Oil Prospects: 1972, 1981, 1985, and 1986	56
21. Estimated Anticipated Profitability of U.S. Oil Prospects, Under Specified Price and Policy Alternatives	58
22. Economic Analysis of Exploration and Development Projects	59
23. Lower-48 Oil and Gas Production.....	59
24. Economic Prospects for Drilling, Based on GRI Hydrocarbon Model Runs	61
25. Sensitivity of Leasable Resource Amounts to Current Oil Price	62
26. U.S. Exploration and Development Outlays for 1973 to 1985.	66

Table No.	Page
27. Sources and Uses of Working Capital of a Group of Petroleum Companies	67
28. Financial Performance of Selected Oil Companies, First 9 Months 1986 v. First 9 Months 1985	70
29. Effect of Falling Oil Prices on Stripper Wells	73
30. Estimated Oil and Gas Resources in the Arctic National Wildlife Refuge Section 1002 Area	83
31. Drill Rig Equipment: Storage and Availability	98
32. U.S. Oil and Gas Reserves Replacements Percentage of Production, 1979-85 and Domestic Implied Finding Costs	102
33. Valuations of Proved Reserves	103
34. Values Added Through Exploration and Development-Worldwide	104
35. Value Added Ratios-Worldwide.	104
36. Mergers and Acquisitions in the U.S. Oil Industry	105
37. Financial Performance of a Group of Oil Companies, 1983-85	109
38. Comparison of 20 Largest U.S. Oil Companies, 1980 and 1985.....	112
39. Comparison of Historical Concentration in the U.S. Oil Industry.	112
40. Capital and Exploration Expenditures for Selected Oil Companies, 1983-85	115
41. Changes in Planned Expenditures on U.S. Exploration and Production	116
42. Reinvestment in Oil and Gas Exploration and Production	119
43. Share Repurchase Programs of Selected Oil Companies	120
44. Reserve Additions Per Oil Well Drilled, 1980-1984 Average	126
45. Past and Projected Alaska Oil Status ...	128
46. Past and Projected California Oil Status ...	128
47. Past and Projected Rocky Mountains and Northern Great Plains Oil Status	128
48. Past and Projected West Texas and Eastern New Mexico Oil Status.	129
49. Past and Projected Gulf Coast Oil Status ..	129
50. Past and Projected Midcontinent Oil Status	129
51. Past and Projected Eastern Interior Oil Status	130
52. Past and Projected Michigan Basin Oil Status	130
53. Past and Projected Appalachians Region Oil Status	130
54. Past and Projected United States Oil Status	131
55. Impact of Increased Stripper Well Abandonment on Low Drilling Scenario Production and Reserves Projections ...	132
