Introduction	3
Description of Screening Technologies.	3
Digital Examination	3
Sigmoidoscopy	4
Hemoccult Test	4
Utilization of Screening Technologies	5
The Development and Diffusion of the Hemoccult Test	5
Clinical Studies of the Effectiveness of Screening Technologies.	9
Methodological Difficulties in Evaluating the Cost of	
Screening Programs	10
Randomized Controlled Trials	10
Uncontrolled Clinical Studies	11
Formal Cost-Effectiveness Analysis.	12
Cost-Effectiveness Model	13
Costs and Benefits of Screening 50-Year-Old, Average-Risk Woman	13
Costs and Benefits of Screening at Different Ages	14
Sensitivity Analysis.. . . .	14
Current Policies	16
References	18

LIST OF TABLES

<i>Table No.</i>	<i>Page</i>
1. Colon Cancer Screening: Cost-Effectiveness Measures, 50-Year-Old, Average-Risk Woman.	13
2. Age To Initiate Sigmoidoscopy: Cost-Effectiveness Measures, 45-Year-Old, Average-Risk Woman.	15
3. Effect of Different Assumptions About the Hemoccult False-Positive Rate: Cost-Effectiveness Measures, 50-Year-Old, Average-Risk Woman.	15
4. Effect of Different Polyp/Cancer Assumptions: Cost-Effectiveness Measures, 50-Year-Old, Average-Risk Woman.. . . .	15

LIST OF FIGURES

<i>Figure No.</i>	<i>Page</i>
1. Colon Cancer Screening: Effect on Life Expectancy and Program Costs of Different Combinations and Frequency of Tests	14
2. Changes in Life Expectancy and Program Costs That Result From Using Different Assumptions About the Hemoccult False-Positive Rate.	16
3. Changes in Life Expectancy and Program Costs That Result From Using Different Assumptions About Polyps	16
