# Foreword

This report on *Medical Technology Under Proposals To ease Competition in Health Care* was prepared in response to requests by the House Committee on Energy and Commerce and the Senate Committee on Labor and Human Resources. In the context of the OTA report *Strategies for Medical Technology Assessment*, the Committees expressed interest in a separate analysis of the implications for the use of medical technology of proposals to promote competition in the financing and delivery of medical care.

This report was prepared by OTA staff. In preparing it, OTA consulted with members of the advisory panel for the study and with other experts in health policy, economics, health administration, and medicine. Drafts of the final report were reviewed by the advisory panel, chaired by Dr. Lester Breslow; the Health Program Advisory Committee, chaired by Dr. Sidney S. Lee; and other individuals and groups with expertise in the area. We are grateful for their assistance.

*Director*

# Advisory Panel On Medical Technology Under Proposals To Increase Competition in Health Care

Lester Breslow, *Chair*  
*School of Public Health, University of California, Los Angeles*

Morris Cohen  
*Director of Technology Assessment*
