

Contents

Chapter	Page
Findings and Conclusions	3
I. Introduction	9
Characteristics of Wood	10
Microstructure of Wood	10
Chemical Characteristics of Wood.....	11
Physical Characteristics of Wood	11
Energy Consumption in Wood Products Manufacture	13
Present and Prospective Uses of Wood	14
Wood as a Fuel.	15
Industrial Wood-Fuel Use	17
Residential and Commercial Fuelwood Use.....	19
Secondary Fuels and Chemicals From Wood	19
Wood Technology and the Resource Base...	20
Research and Development on the Use of Wood	23
Federal Government R&D Activities	26
R&D in Academic Institutions	27
Industrial R&D	28
II. Solid Wood and Panel Products	33
Summary and Conclusions	33
Introduction	34
Profile of the Lumber and Panel Products Industry	34
Raw Materials.....	35
Product Demand ...	35
Industry Size and Distribution of Production	36
Use of Solid Wood and Panel Products	39
Industry Trends and Potentials	40
Product Recovery	40
Forest Resource Use,	40
Efficient End Use of Wood Products, ,	41
Lumber Products	41
Lumber Manufacture	42
Potential Improvements in Milling Efficiencies and Lumber Manufacture ..	42
Consumption and Use of Lumber Products in the United States	48
Plywood and Panel Products	49
Plywood	50
Particleboard ,....	54
Structural Composite Panels	55
Fiberboard	58
Present and Future Use and Consumption of Panel Products.	58
Wood Use in Light Frame Construction.	61
Wood Conservation	61
New Uses for Solid Wood Material	63
Composites of Wood and Other Materials	63
III. Pulp, Paper, and Fiber Products	67
Summary and Conclusions	67
Introduction	68
Profile of the Pulp and Paper Industry ,.... . ,.....	68
Uses of Pulp, Paper, and Paperboard	69
Advanced Paper Materials	71
Role of Paper and Cellulosic Materials in the U.S. Material Mix	72
Competition From Plastics	74
Competition From Electronic Technologies,	76

Contents—continued

	Page
Pulp, Paper, and Cellulose Fiber Manufacturing	79
Mechanical Pulping	79
Chemical Pulping	85
Dissolving Pulp Technologies	92

List of Tables

Table No.	Page
1. Taxonomy of Major Forest Products	9
2. Physical Properties of Wood	12
3. Structural Properties of Some Wood, Metals, and Masonries	13
4. Energy Requirements for Primary Commodities	14
5. OTA Calculations of Wood-Fuel Removals, 1980	17
6. Estimated Wood Stove Shipments and Inventory	19
7. Status of Selected Technological Developments in Wood Utilization	24
8. Funding and Man-Year Commitments by Activities at the U.S. Forest Service, Forest Products Laboratory, Madison, Wis.: Fiscal Year 1981 ,,,,,, 26	
9. 1981 Funding and Scientist-Years by Activities at the U.S. Forest Service Experiment Stations, 1981	27
10. Funding of Wood Utilization R&D Performed by U.S. Academic Institutions in Fiscal Year 1980	28
11. Domestic Consumption of Lumber and Panel Products, 1976	37
12. Selected Statistics on the Lumber and Panel Products Industry, 1981	38
13. Number of Primary Timber-Processing Establishments in the United States, by Industry and Type of Organization, 1972	38
14. Lumber Production by Mill Size, 1979	38
15. Large Mills and Production by Region and Size ,	38
16. Types of Softwood Sawmills and Their Primary Product.	41
17. Summary of Major Technologies for Improved Lumber Manufacture	44
18. Plywood and Panel Products Consumed in New Residential Construction in the United States 1962-80	50
19. Plywood End Uses and Their Susceptibility to Penetration by "New" Panels	60
20. Summary of Major Technologies for Plywood and Panel Product Manufacture	60
21. Benefits of Truss Framing	63
22. Estimated North American Capacity by Grade of Top 20 Pulp, Paper, and Paperboard Producers	70
23. U.S. Production of Paper and Paperboard in 1981 and Projected for 1984....	71
24. Uses, Grades, Production, and Consumption of Paper Products in the United States in 1979	73
25. New Information Technologies and Their Potential Impact on Paper Construction.....	78
26. Major Commercial Wood-Pulping Methods, Grades of Pulp, and End-Products	80
27. Summary of Process Variables for Mechanical Pulping	83
28. Energy Demand Per Ton of Kraft Paper	89
29. Energy Consequences of Pyrolytic Recovery	89
30. Strength Properties of Press-Dried Hardwood Paper and Conventional Softwood Paper	92

Contents—continued

List of Figures

Figure No..	Page
1. Three Characteristic Directions of Wood That Are Influenced by Wood Properties	13
2. U.S. Wood Energy Consumption, 1850-1980.	15
3. Estimated Wood-Fuel Consumption, 1961-81	16
4. Timber Supply to and Product Output From Primary Processing Plants, 1976	18
5. Chemicals From Wood.	21
6. Historical Research and Development Expenditures	29
7. U.S. Trade in Lumber and Panel Products, 1976.	35
8. Flow Diagram of a Typical State-of-the-Art Small-Log Sawmill, Indicating Process Waste Streams	42
9. Present and Predicted Materials Balance for Softwood Lumber Based on Ovendry Weight	43
10. The Maximum Yield of Lumber From Conventional and Innovative Processes.	45
11. Per Capita Consumption of Lumber 1950-79	48
12. The Truss Frame System	49
13. Flow Diagram of a Small-Log Plywood Mill	51
14. Material Balance for Softwood Plywood Based on Ovendry Weight	52
15. Materials Balance for the Manufacture of Underpayment Particleboard Based on Ovendry Weight.	54
16. Materials Balance for the Manufacture of Structural Particleboard Based on Ovendry Weight of Chipping and Flaking of Sound Wood	55
17. Idealized Typical Waferboard Process	56
18. Idealized Typical Oriented Strand Board Process	57
19. Historical Production of Major Panel Products, 1970-79	59
20. Offcenter, In-line Joint Spacing	61
21. Wooden I-Beam Construction, Cross-Section	62
22. Proportions of Woodpulp Produced by Commercial Pulping Processes	80
23. Schematic Flow Diagram of Alternative Mechanical Pulping Processes	81
24. Wood and Energy Flows in Mechanical Pulping Mills in Conjunction With Recycling	82
25. Material and Energy Flow into a Kraft Pulpmill	86
26. Overall View of Papermaking From Chemical Pulp by the Kraft Pulping Process	88
